Yes, I am just showing that the action plan is working great as shown by the graph. Action plan has greatly reduced the overall Chilkat King catches. Some people like to see graphs and some like numbers so just trying to make it as obvious as possible that what they are doing already is working. Thanks.

Stuart Dewitt

Good morning Stuart,

Would you please provide some explanation for what you are trying to say. The board has this information and absent some discussion on your part we don't know what you are trying to convey.

Thanks,  
Glenn
