

Proposal # 57 Herring / SUBSTITUTE LANGUAGE  
 PROPOSAL #57  
 a last minute CFEC MEMO just received

sheds new light on this proposal and requires new consideration.

Similarly a last minute suggestion that the Sae Roe quota surplus be allocated to the Bait permits is not fair, and has had no broad based discussion.

Based on this note, and CFEC position, I reference page 5 of the CFEC paper under "action needed by CFEC" and suggest that

Both categories of Permits be combined under a newly defined fishery as simply the "Herring Fishery" and further that the quota be combined as one for the general fishery, A + B Season would stay as proposed.

If there is no broad support for this compromise, I suggest "no action" and we will work on it until next cycle.
