

Proposals 62 and 70

We urge you to reject proposals 62 and 70. By limiting usual and accustomed fishing areas you are going to redirect the fleet that fish those areas to areas that will affect our set net harvest in the Alitak District. There is already not enough fish in the Alitak district to make fishing there profitable.

Thank you for your attention in this matter.

Richard and Feryll Blanc set net fishermen for 53 years.
