

My name is Kevin Smith and I am a full time resident of Togiak. I'm writing in to support proposal 256.

Many of the Togiak residents were not aware or in support of proposal 29 that was passed last year.

I think 256 is a good compromise, and you can see the intent to allow unique opportunity for sockeye all the while protecting kings by keeping the catch and releases part of the regulation but more importantly only allowing bait on artificial lures which will reduce mortality hook ups for all species not just kings.

Thank you,

Kevin Smith
