No vote on proposal 95

I would like to see the 5 mile coridor reduced to not more than 1/4 mile. You would get your objective of keeping hunting on the Denali Highway to a mininum.

The 5 miles wide coridor is a public hazard. It would force hunters to rage much farther out and distance would be a problem if one would break down with a snowmachine.

You are creating a snowmachine only hunting oppertunity not allowed by all hunters.

I have no problem with the 5 bird limit.

My vote is NO on 95
