

HOUSEHOLD COMMUNITY HARVEST REPORT - MOOSE

GROUP NUMBER:

This section of the community harvest report must be completed for each household for which at least one (1) household member is registered in the community subsistence hunt for moose, established in 2006-170-BOG. The questions on this form apply to all members of the household, even if they are not registered as part of a community subsistence hunt group. Responses on these forms will not be used to determine hunt eligibility for individuals or households.

FILL OUT THIS FORM, EVEN IF MEMBERS OF YOUR HOUSEHOLD DID NOT HUNT IN 2013

1.) How many people live in your household? (include all members, even those that are not signed up as a part of your CSH community)

2.) Please fill in the following information for each member of your household, even if they did not participate in hunting, fishing or gathering activities in 2013 or are not registered participants of the community subsistence hunt for moose.

Person #	In WHAT YEAR was this person born?	Registered CSH community member?	Thinking of only your activities in the CSH MOOSE HUNTING AREA in 2013, did members of your household....													
			HUNT FOR...				FISH FOR...			Pick Berries / Vegetation	PROCESS...					
			Moose	Caribou	Other Game	Waterfowl	Salmon	Fish other than salmon	Trap		Moose	Caribou	Other Game	Birds	Fish	Berries / Greens

How many times did any members of your household go out each month in the moose harvest CSH for the following activities?

include any trip where a single member of the household went out, even if they went with another household.

	January	February	March	April	May	June	July	August	September	October	November	December
3a.) Fishing	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
3b.) Hunting	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
3c.) Trapping	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
3d.) Pick berries / vegetation	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

... CONTINUED FROM PREVIOUS PAGE

	Left over from previous year	Harvested	Received from another member of your community	Received from someone else	Didn't get any moose
4.) Where did your household get the MOOSE you used in 2013?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

(Check all that apply)

5.) Did members of your household attend a community sharing event in 2013?
(if yes, then...) Y / N *(circle)*

5a.) When did the community sharing event occur?

5b.) Describe the sharing event _____

5c.) About how many community members were present at this sharing event?

5d.) About how many people not in your CSH community were present?

(if none of your household members hunted for moose this year, skip to Question 11 on the next page)

6.) How many times did members of your household go hunting for MOOSE in 2013?

7.) Not including household members, how many people in your CSH community did you hunt MOOSE with?

	Other hunting	Fishing	Picking berries
8.) Were any of your household's moose hunting trips combined with the following activities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

9.) How many moose did members of this household harvest? *(include only those moose SHOT BY members of your household)*

10.) How many moose harvested by your household were taken by youth, age 16 and younger? *(include only those moose SHOT BY youth from your household)*

11.) On average, about how much of each moose harvested did your household retain? NONE 1/4 moose 1/2 moose 3/4 moose ALL OTHER Describe: _____
(circle one)

12.) Who processed the meat your household harvested? _____
(ex: Commercial processor, family member, self, other community member(s) etc...)

For members of your household, briefly describe how each following part of moose harvested in 2013, were used.

13a.) Bones _____

13b.) Hide _____

13c.) Fat _____

13d.) Head _____

13e.) Heart _____

13f.) Liver _____

13g.) Kidneys _____

... CONTINUED FROM PREVIOUS PAGE

14.) Have members of your family always used the moose CSH area for hunting, fishing, trapping, and berry/green picking activities? Y / N (circle)

(if no, then)
14a.) About what year did members of your family begin using the moose CSH area for hunting, fishing, trapping, and berry/green picking activities?

14b.) Do members of your household participate in hunting, fishing, trapping or berry/green picking activities: Every year Most years Some years Once or twice Never
(circle one)

15.) Do any of your family members own or rent property in the moose CSH area, including homes, cabins, undeveloped land or recreational property? Y / N (circle)

16.) Hunting/Trapping activities OUTSIDE of the moose CSH area.

Include ALL units customarily used by members of your HOUSEHOLD, for hunting and trapping except those portions of units covered by the moose CSH

List other game management units used for hunting by members of your household members, even if those household members are not members of your moose CSH community.		Are uses of these units Routine / Occasional / Rare	How many members of your household use or have used other areas?
16a.) Moose	<hr/>	<input type="text"/>	<input type="text"/>
16b.) Caribou	<hr/>	<input type="text"/>	<input type="text"/>
16c.) Other Game	<hr/>	<input type="text"/>	<input type="text"/>
16d.) Birds	<hr/>	<input type="text"/>	<input type="text"/>
16e.) Trapping	<hr/>	<input type="text"/>	<input type="text"/>

17.) Fishing activities OUTSIDE of the moose CSH area.

Include ALL areas customarily used by members of your HOUSEHOLD for fishing, except those areas and fisheries within the moose CSH

List water bodies or fisheries used by members of your household, even if those household members are not a part of your moose CSH community.		Are use of these areas Routine / Occasional / Rare	How many members of your household use or have used other areas?
17a.) Salmon	<hr/>	<input type="text"/>	<input type="text"/>
17b.) Trout	<hr/>	<input type="text"/>	<input type="text"/>
17c.) Whitefish	<hr/>	<input type="text"/>	<input type="text"/>
17d.) Other fish	<hr/>	<input type="text"/>	<input type="text"/>

Copper Basin community subsistence hunt (CSH) household report

Detailed explanation of questions, and proposed scoring criteria.

All points will be weighted according to the direction provided from the Board of Game to the department. The proposed scoring system currently categorizes each question into one or more of the eight criteria described in the Board of Game finding 2006-170-BOG. Scores for each question are adjusted to provide equal weights to each of the criteria. Each element, category, or question may be additionally weighted under the direction of the Board of Game to accurately reflect the intent of the board in determining adherence to the customary and traditional use pattern as well as continued eligibility for groups or communities.

To enhance consistency in scoring, and prevent group/community size from inappropriately affecting scores, proportions and percentages will be used as often as possible. Four categories are defined:

- None – 0% of measurement.
- Minimal – 1–25% of measurement, rounded up.
- Marginal – 26–49% of measurement, rounded up.
- Significant – 50% or more of measurement, rounded up.

Under this recommendation, two types of reports will be required from each group. Each of these report types is described below.

Household report

The household report will provide the greatest detail regarding group participation, and provide the department a mechanism for using quantitative measures for assessing adherence to the criteria in the board's finding 2006-170-BOG. Individual households will not be scored, and, unless additional board decisions are put into place, will not be used to disqualify any single household from the Copper Basin community subsistence hunts for moose or caribou.

Question 1

The intent of this question is to identify the total number of individuals living in a household, regardless of age or whether or not that individual has been registered as part of the Copper Basin CSH group/community. This question will not be scored; it will be used as a tool to assist in validation of reporting.

Question 2

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose and caribou areas consistent in part with criteria 1, 2, 4, 6, and 8 in 2006-170-BOG. Due to the complexity of the questions asked and the breadth of criteria covered, points will be applied selectively according to the findings applicable to the scoring criteria. The

scoring will be carried out as follows: points for this question are additive, and apply to the group as a whole, and scores will be assessed by looking at all responses from all households in the group.

Scores will be split according to:

- 2-1: points apply to Criterion 1 of the board's findings at 2006-170-BOG.
- 2-2: points apply to Criterion 2
- 2-4: points apply to Criterion 4
- 2-6: points apply to Criterion 6
- 2-8: points apply to Criterion 8

Scoring 2:

1 point will be added to 2-1, and 2-6 if at least a **minimal proportion** of group members, younger than 16 years old, participated in each of the following:

Hunting, and
fishing, and
berry picking, and
processing of any game, and
processing of any fish, and
processing of any berries.

1 point will be added to 2-2, 2-4, and 2-8 if at least a minimal proportion of group members of any age participated in each of the activities listed.

1 point will be added to 2-2, 2-4, and 2-8 if at least a marginal proportion of group members of any age participated in each of the activities listed, except trapping, and moose/caribou hunting. These points are in addition to any points already awarded for participation.

1 point will be added to 2-1, and 2-4 if a minimal proportion of elders participated in any of activities listed.

1 point will be added to 2-2, 2-4, and 2-8 if a **significant proportion** of group members participated in any **processing** activity.

Questions 3a-3d

The intent of these questions is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou areas consistent in part with criteria 2, 4, and 8 in 2006-170-BOG. The scoring will be carried out and assigned to the factors as follows: points for this question are additive, and apply to the group as a whole, and scores will be assessed by looking at all responses from all households in the group.

Scoring 3a – 3c:

1 point will be awarded for each of 3a – 3c if at least a marginal proportion of households made more than one trip in each of three different months for each question.

Scoring 3d:

1 point will be awarded for 3d if at least a marginal proportion of households made more than one trip in each of two different months.

Question 4

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou areas consistent in part with Criterion 7 in 2006-170-BOG. The scoring will be carried out as follows:

Scoring 4:

1 point will be awarded if a minimal proportion of households received moose or caribou, as appropriate, from another member of the Copper Basin CSH moose or caribou group.

2 points will be awarded if a marginal proportion of households received moose or caribou, as appropriate, from another member of the Copper Basin CSH moose or caribou group.

0 points will be awarded in all other circumstances.

Questions 5-5d

The intent of these questions is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou area consistent in part with Criterion 7 in 2006-170-BOG. The scoring will be carried out as follows:

Scoring 5:

1 point will be awarded if at least a marginal proportion of households attended a community sharing event.

0 points will be awarded in all other circumstances.

Scoring 5a-5d:

1 point will be awarded for each community sharing event, if more than one sharing event has been indicated by household members, and at least a marginal proportion of group members and at least one non-group member attended. Only up to 2 points will be awarded this way.

Question 6

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH caribou or moose area consistent in part with Criterion 4 in 2006-170-BOG. Multiple trips indicate a high reliance on and familiarity with the area.

Scoring 6:

1 point will be awarded if a marginal proportion of **hunting households** made more than 3 trips to hunt for moose or caribou, as appropriate, in the respective Copper Basin CSH moose or caribou areas. "Hunting households" is defined as any household having one or more members that indicated moose or caribou hunting activities in Question 2.

0 points will be awarded in all other cases.

Question 7

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou areas consistent in part with Criterion 3 in 2006-170-BOG. Working closely with other hunters, and combining resources, such as equipment and transportation, is an effective way to reduce costs and improve hunting efficiency.

Scoring 7:

1 point will be awarded if a significant proportion of hunting households hunted with at least 2 other group members, who were also not part of the same household.

0 points will be awarded in all other circumstances.

Question 8

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou area consistent in part with criteria 3 and 8 in 2006-170-BOG. Harvesting multiple resources while searching for moose or caribou is an effective way to combine trips to reduce costs.

Scoring 8:

1 point will be awarded for each of the three other activities indicated as a combined trip.

0 points will be awarded in all other circumstances.

Question 9

This question will not be scored, but will be used to ensure accurate reporting by households and group coordinators. It may also be used in the future as an indicator of success and in effort metrics to determine the performance of these hunts.

Question 10

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou area consistent in part with Criterion 6 in 2006-170-BOG. Harvest of moose and caribou by youth indicates transfer of knowledge to subsequent generations, in order to maintain group harvest and use patterns.

Scoring 10:

1 point will be awarded if any moose or caribou, as appropriate, have been harvested by a youth (age 16 or younger) by the group during 2013.

0 points will be awarded in all other circumstances.

Question 11

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou area consistent in part with Criterion 7 in

2006-170-BOG. If, on average, hunting households give away significant proportions of meat, this indicates a highly developed and meaningful sharing pattern, consistent with 2006-170-BOG.

Scoring 11:

2 points will be awarded if (on average) a significant proportion (50% or more) of meat was shared by a significant proportion (50% or more) of harvesting households.

1 point will be awarded if (on average) a marginal proportion (26–49%) of meat was shared by a significant proportion (50% or more) of harvesting households.

1 point will be awarded if (on average) a significant proportion of meat (50% or more) was shared by a marginal proportion (25–49%) of harvesting households.

0 points will be awarded in all other circumstances.

Question 12

The intent of this question is to identify that the group is establishing **or** is continuing a pattern of use in the respective Copper Basin CSH moose or caribou area consistent in part with Criterion 3 in 2006-170-BOG. Processing of game meat can be expensive (\$3.00/lb and more) and take a significant amount of time. By processing the bulk of meat with group members, or individually, groups can significantly reduce the costs of processing moose and caribou.

Scoring 12:

2 points will be awarded if a significant proportion (50% or more) of harvesting households did not indicate any use of commercial wild game meat processors.

1 point will be awarded if a significant proportion (50% or more) of harvesting households processed the meat using any other method than commercial processors.

0 points will be awarded in all other circumstances.

Questions 13a-13g

The intent of these questions is to identify that the group is establishing **or** continuing a pattern of use that includes the use of all parts of the moose or caribou, as appropriate, that are required to be taken from the field. This, in part, addresses criteria 3 and 5 in 2006-170-BOG. These questions seek to clearly establish the specific uses each part of the animal is subject to. Additionally, these questions attempt to establish additional efficiency in effort by using as much of the animal as possible. In any case other than the stated examples, 0 (zero) points will be awarded.

Scoring 13a:

1 point will be awarded for consumptive uses, such as cooking down for stock, or use in crafts

Scoring 13b:

1 point will be awarded for uses involving tanning for clothing, blankets, or other crafts.

Scoring 13c:

1 point will be awarded for any human consumption use.

Scoring 13d:

1 point will be awarded for uses involving human consumption of fats or tissues, or uses of the brain for such things as tanning.

Scoring 13e:

1 point will be awarded for uses involving human consumption.

Scoring 13f:

1 point will be awarded for uses involving human consumption.

Scoring 13g:

1 point will be awarded for uses involving human consumption.

Questions 14 – 14b

The intent of these questions is to identify that the group is establishing **or** continuing a long term pattern of use, close ties to, and familiarity with the respective Copper Basin CSH moose or caribou area. This, in part, addresses criteria 1 and 4 in 2006-170-BOG. These questions are to be scored as a single question. A maximum of 1 point is available for these questions. These questions are intended to distinguish groups where most of the households have either already established a historical pattern of use, or are working toward establishing a historical pattern of use.

2 points will be awarded if a significant proportion (50% or more) of households indicated their family has always used the respective Copper Basin CSH moose or caribou area for subsistence activities.

-OR-

2 points will be awarded if a significant proportion of households indicated their family started using the respective Copper Basin CSH moose or caribou area more than 25 years prior (1 generation) to the current hunting year, and use the respective Copper Basin CSH moose or caribou area every year or most years.

-OR-

1 point will be awarded if a marginal proportion (26-49%) of households indicated their family has always used the respective Copper Basin CSH moose or caribou area for subsistence activities.

-OR-

1 point will be awarded if a marginal proportion (26-49%) of households indicated their family started using the respective Copper Basin CSH moose or caribou area more than 25 years prior (i.e., one generation) to the current hunting year, and use the areas some years, most years or every year.

-OR-

1 point will be awarded if at least a marginal proportion (26-49%) of households indicated their family started using the respective Copper Basin CSH moose or caribou area more than 12 years prior (i.e., a half generation) to the current hunting year, and use the areas most years or every year.

-OR-

1 point will be awarded if at least a marginal proportion (26-49%) of households indicated their family has only started using the respective Copper Basin CSH moose or caribou area within the past 10 years, and use the areas every year.

Question 15

The intent of this question is to identify that the group is establishing **or** continuing a pattern of close ties to and familiarity with the areas. This, in part, addresses Criterion 4 in 2006-170-BOG. Owning or renting any type of property in the respective Copper Basin CSH moose or caribou area, regardless of residency, indicates a strong and continuing connection to the areas.

Scoring 15:

1 point will be awarded if a minimal proportion of households owns or rents some type of property in the respective Copper Basin CSH moose or caribou area.

0 points will be awarded in all other cases.

Questions 16a-17d

The intent of these questions is to identify that the group is establishing **or** continuing a pattern of reliance of the respective Copper Basin CSH moose or caribou area for hunting a wide variety of species. This, in part, addresses Criterion 8 in 2006-170-BOG. Extensive use of areas outside of the respective Copper Basin CSH moose or caribou area counter-indicates a high level of reliance on that respective Copper Basin CSH moose or caribou area, which is not consistent with the patterns described in 2006-170-BOG. These questions will be scored and weighted in several parts, although unless otherwise specified, each question will receive 0 (zero) points.

Scoring questions 16a and 16b:

0 points will be awarded if there is any indicated use of other areas; this is prohibited under the terms of the respective Copper Basin CSH moose or caribou permit. Under the direction of the Board of Game use of other areas could result in automatic group disqualification.

1 point will be awarded to both 16a and 20b in all other cases.

Scoring questions 16c-17d:

A reliance score will be calculated for each line using the following formula:

Number of other GMUs used times (number of individuals using divided by total number of group members) times (1.5 if frequent or 1 if occasional or 0.5 if rare).

A reliance score of one or less [equivalent to a significant proportion (50%) of members occasionally using one other GMU], will receive **1 point**.

Any reliance score above one will receive 0 (zero) points.

To get the appropriate information to compute a group score, the following steps will be taken:

- Fishing areas will be translated into the closest applicable GMU for the fishery or waterbody indicated, and
- Household reports will be combined so that all GMUs listed will be counted one time, and
- All people indicated will be counted one time, and
- Frequency will be averaged, using the weight factors indicated above.
