Dear Members of the Board of Game:

Please accept the following comments from the Togiak National Wildlife Refuge (Refuge) concerning the proposals to be considered by the Alaska Board of Game during its February 13-20, 2015 meeting. These comments are in addition to those we submitted in a letter dated January 26, 2015.

Proposal #53 – Oppose/Neutral

Rationale: We are opposed to allowing moose carcasses from natural mortalities to be moved into locations that are more conducive to hunting bears. This provision may encourage the poaching of moose to be used in this manner; this likely is why this practice is currently not allowed anywhere in the state.

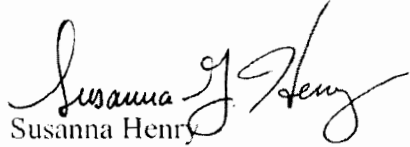

We are also opposed to allowing the use of bait and lures for taking brown bears as this has the potential to condition brown bears to eat and seek out human food which would result in more conflicts (i.e. defense of life or property damage) with other users. The practice of using bait for brown bears is in conflict with the proposed regulatory changes currently being considered for all National Wildlife Refuges in Alaska. These regulatory changes are being proposed to ensure that the taking of fish and wildlife on Refuges in Alaska is consistent with federal laws and U.S. Fish and Wildlife Service policies.

Baiting is currently permitted on the Refuge for black bears. The Refuge currently supports small numbers of black bears and black bear hunting is only practiced by a few hunters.

We are neutral on returning to a one bear per year bag limit.

Thank you for your time to review our additional comments on this proposal. If you have any questions, please contact me or Supervisory Wildlife Biologist Pat Walsh at (907) 842-1063.

Sincerely,

A handwritten signature in black ink that reads "Susanna J. Henry". The signature is fluid and cursive, with the first letters of each word being capitalized and prominent.

Susanna Henry
Refuge Manager
