Please stop the killing of these animals. I know as a superior species we feel like we have the right to do this, but we dont...! Just like any species, there are bad "apples" but that should not speak for an entire species. Do you really want your children and grandchildren and so on to grow up in a world without life...? I have been around wolves and wolf hybrids my whole life. They are some of the most caring and loving creatures. Stop allowing selfish people to dictate what lives and dies. If something is not directly harming you or the ones you love, killing should be the last resort. Thank you for your time.
