Alaska Board of Game

Proposal 90 has been brought before the Alaska Board of Game by the Alaska Wild Sheep Foundation (the local chapter of a well-funded outside national organization), whose primary mission is the "conservation" of wild Dall sheep for purposes of recreational viewing, hunting, etc. They are requesting that the Board of Game eliminate domestic sheep and goats from Alaska's "Clean List". Their proposal would require that all owners of domesticated sheep and goats obtain permits from the Alaska Department of Fish and Game (ADF&G) to own their livestock, complete expensive testing for unspecified diseases (testing which is not yet available), and that "all domestic sheep and goats within 15 air miles of Dall sheep habitat must be contained within a ADF&G approved facility (double fence, etc.)" Based on studies from the Rocky Mountain West in areas where free-range grazing on public lands is permitted and disease transmission is allegedly, but not scientifically proven, linked to overlapping ranges and direct contact between wild and domestic herds, the Wild Sheep Foundation is asking the Board of Game to take what they refer to as "proactive" and "preventive" measures here in Alaska. There are a number of problems with the premises and requirements of Proposal 90, and enactment of this extreme and unnecessary set of costly requirements (both to individuals domestic sheep and goat owners, and to the State of Alaska) would place extreme hardship on all Alaskan sheep and goat owners. There are no commercial goat or sheep operations in Alaska, and Alaska's owners of domestic goat and sheep generally own only a few sheep or goats on small fenced acreage, on a small personal budget, located far from wild sheep habitat. Satisfying Proposal 90's requirements for double fencing, testing, and permitting is completely unreasonable, financially burdensome, and unnecessary. All owners would be hit hard by the inability to import new genetics, as animals not on the "Clean List" may not be imported. Consequences for non-compliance with any of the new rules would include fines and eradication of livestock. For many owners their sheep and goats are not just producers of wool, milk or meat, but are their life's passion and beloved family pets or children's 4-H projects. Even if you don't live in Alaska, this proposal should be both concerning and objectionable to you. At no other time or place in the history of this country has a group of conservationists led by hunting interests attempted to coerce a government agency to put small livestock owners out of business by enacting regulatory action with costly inspection and enforcement ON PRIVATE LAND. If this proposal is successful in Alaska, the Wild Sheep Foundation and other related "conservation" organizations will likely put other species of livestock in Alaska as well as other states in their cross-hairs. Farming and hunting are both time-honored traditions, and neither group should be unreasonably disenfranchised to serve the other. It's not just about our animals, it's about our freedom as taxpaying landowners to use our own land to grow our own food. Please join us in OPPOSING Prop 90.

1.	Tony DeBacco	NORTH EAST, PA	I see the corruption of making money has hit the Beauty of Alaska. Permits for farmers to possess a certain kind of animal for their farm? Rings of money and corruption. The rest of the U.S. made it hard for farmers, so since that has already hit the main part, let's know go after Alaska. Keep your hands out of one of the last states of beauty and simple living.

11.	Stephanie McCutcheon	Madison, WI	
12.	James O'Connor	Soldotna, AK	The disease problem needs real answers, not scapegoats.
13.	Jennifer holden	chugiak, AK	
14.	Suzy Crosby	Wasilla, AK	This proposal is an assault against our food supply, our livelihood, our sustainable lifestyle, and our passion. It sets a dangerous precedent for all livestock owners, both in Alaska and around the country. Farming and hunting have co-existed in harmony in Alaska for decades, and should be able to continue to do so.
15.	Kristina Libby	Willow, AK	
16.	Deanna Oconnor	Kenai, AK	Food security is a real issue in AK. This proposal is assaulting our abilities to feed and clothe ourselves, and violates our rights to have livestock on our own property. Do not allow this dangerous precedent to gain a foothold and potentially spread to other livestock and other parts of the nation.

24.	Carlene Speight	HOMER, AK	
25.	Jim O'Connor	Kenai, AK	The clean list is a bludgeon which will very negatively affect people who aren't any where near wild goats or sheep. If there is really a problem here, it needs to be addressed in a more appropriate way. Many risks can be mitigated simply by making it known that there is a potential problem, as I'm sure most of us like the wild sheep and want them to do well.
26.	Katrina Hammond	Wasilla, AK	
27.	Jared Palmer	Anchorage, AK	
28.	Kimberly Fasser	Palmer, AK	Kimberly A. Fasser
29.	Renee Laseter	Anchorage, AK	It seems between this and restricting hunting on fed lands that Alaskans are being starved out.

32.	Carissa Fortier	Palmer, AK	
33.	Pam Srna	Ketchikan, AK	
34.	Heidi Deadmond	Palmer, AK	The Wild Sheep Foundation is NOT a conservation organization. Conservationists both live on, and protect the land that sustains them. WSF is a heavily funded organization working to destroy the livelihood of true conservationists to carve out exclusive hunting grounds for themselves. These tactics mirror radical environmental activists, using taxpayer \$, who have shut down entire towns to "protect" some species or another (the majority of whom were already thriving).
35.	Andrea Smith	Palmer, AK	Allowing this proposal to go through would be criminal. I support our local farms. I strongly support Alaska's autonomy and ability to get milk and meat from local sources. I strongly support freedoms in this United States to maintain our own property and livestock without their removal and destruction by the government. This does not affect Alaska wildlife nor has it been an issue here in our state. Do not penalize the good people of this state.
36.	Ken Gridley	Wasilla, AK	We raise Foul and have had goats before and have done so here at this location for over 20yrs. now. Although a few rental structures have sprung up over the past few years, this is still a farm friendly area. (Alaskan Estates#1).
37.	Amber Price	Chugiak, AK

	Name	From	Comments
38.	Stacy Oliva	Nikiski, AK	<i>(continued from previous page)</i> rights protected as the first priority by all departments and divisions of the state of Alaska. Vote No on proposal 90. This proposition should be opposed by ALL reasonable Alaskans. I stand opposed to Proposal #90 and ask the ADF&G and BOG, and all Alaska law makers to do the same.
39.	Donna Braendel	Chickaloon, AK	As a family of sheep hunters i feel it is important, before ruining a number of small business to research the connection between disease from livestock and wild sheep a lot more thoroughly. Alaska is in a very vulnerable place as far as food production is concerned and as we are isolated, and import so much of our food already it is foolhardy to restrict without good cause, what local producers we have. This is an ill advised proposal, and potentially will do far far more harm than good. Please let us stay self sufficient!

61.	Becky Oviatt	Palmer, AK	There is currently no herd die off related to the pneumonia in question. There have been no studies done here in Alaska nor have the farmers been contacted about this proposal. I want to be able to coexist with my hunting self and my farming self.
62.	Chris Cook	Kenai, AK	
63.	Russell Throckmorton	Wasilla, AK	Save my goats from the AK government.
64.	Kailyn Wolf	Kenai, AK	
65.	Jennifer Tamas	Anchorage, AK	
66.	Becky Davenport	Chugiak, AK	Please don't prevent people from having their rights to have small farms.
67.	Ashlee Johnson	Chugiak, AK	
68.	Terry Newbold	Eagle River, AK	
69.	Jennifer Wingard	Delta Junction, AK	This proposal will hinder and discourage Alaskans providing for their own food needs and encourage dependence on the lower 48. Part the Alaska's innate beauty is the freedoms people have to provide for themselves that are sorely lacking in most places in the lower 48. While conservation of wild species is important, there's not yet been sufficient research done to declare livestock a threat in the way this over-reaching proposal is attempting. Instead of bowing to the money behind the organizations attempting to pass this proposal and ensure the wild herds thrive solely to supply sport hunters with game, perhaps it would be best to table the proposal until sufficient research can be done before taking away the rights of Alaskans to feed and support themselves through raising livestock inexpensively and without undue government oversight (which will, inevitably strain an already over-extended state budget).
70.	Christina Miller	Soldotna, AK	
71.	Joe Rutherford	Eagle River, AK

129.	Barbra Wills	Soldotna, AK	I raise goats for milk, meat and personal enjoyment. They produce wonderful garden compost as well. They are a big part of my families life.
130.	Brandy Billing	Big Lake, AK	This bill seems ridiculous. As hard as it is already to get food to Alaska...this makes it harder. Not to mention the people who have the livestock as pets, and 4H project. Our state needs to focus on becoming more sustainable instead of implementing more rules to make it harder to do so.
132.	Christine Ford	Kodiak, AK	
133.	Robert Bizzarro	Fairbanks, AK	
134.	Danielle McCammon	Mossyrock, WA	
135.	Maribeth Rogers	Cedar City, UT	Alaska has such a rich history in agriculture and that history is at risk of being wiped out. Farming in Alaska has declined so drastically, instead of attacking it, it should supported and encouraged. Small farms have walked side by side with game animals for generations with little to no adverse affect, why has that all of a sudden changed? Not only is Alaska allowing outside interest groups to whittle away its rights to feed and provide income for itself but this act is trampling over the rights of private citizens to raise animals; normal, everyday animals found world wide, on their own land. For what is supposedly the freest state in the union, this would be devastating for personal freedom and the independence of the state. I am a displaced Alaskan and though we were going to move back in a few years...if this passes, that dream of returning home would be dashed. I won't move to a state, no matter how beautiful, if I can't even raise regular livestock on farmland. So sad that Alaska would even consider this. Please vote NO!

355. Tina Starr Judd	Wasilla, AK	Alaskans need a sustainable agricultural industry where our food diversity, reliability, and healthy alternative is supported and allowed to prosper, not diminished by drastic government regulation which is unnecessary, costly, and divisive. Proposition 90 which is being promoted primarily by an outside special interest hunting conservation group (the Wild Sheep Foundation), requests the state remove domestic sheep and goats from the so-called "Clean List", and while perhaps well intended, the requests places extreme regulatory burden on private land owners with domestic sheep and goats. The result would be cost prohibitive regulatory requirements imposed on domestic livestock owners to double fence their property, complete as of yet unidentified and undeveloped testing protocols, and apply for permits from the State of Alaska to own such domestic livestock. Alaska residents that own domestic sheep or goats as beloved family animals, 4-H projects, or small farm operations are up against a well-funded outside interest group who has stated they will continue their fight through the State legal system. They purport links between domestic sheep and goats to bacteria within the wild sheep population in the lower 48. This allegation has yet to be actually scientifically proven, and in fact the science indicates that the wild sheep population may inherently carry the bacteria which weakens the immune system after being triggered by natural environmental stress events. In any event there has not been a single proven case of bacteria or virus transmission between domestic sheep and goats and the wild sheep population in the State of Alaska. Additionally, unlike lower 48 states, Alaska has no open grazing practice on public lands further reducing any likely exposure to domestic livestock, and in the event that a domestic sheep or goat escapes from its owner's property, Alaska's wild predators (wolves and bears) will likely dispatch the domestic animal in short order – in fact, our domestic livestock are often killed right on the private owner's property by Alaska's wild predators. Alaska is in the midst of a financial crisis with a projected annual budget shortfall of \$4 BILLION dollars! It is cutting basic services to state residents, considering passing state <i>(continues on next page)</i>

355. Tina Starr Judd	Wasilla, AK	<i>(continued from previous page)</i> income taxes and sales taxes, and reducing or eliminating the Permanent Fund Dividend program. The fact is, the State has no funding for new costly State programs – especially those that are unnecessary, virtually impossible to enforce, and lack any scientific basis in our State.
356. Sandra Shacklett	Wasilla, AK	
357. Dave Eaton	Newport News, VA	
358. Vickey McDonald	Talkeetna, AK	Domestic sheep and livestock are no threat to wild populations. The bigger threat is to our food source if there is a stoppage of any kind in getting grocery stores resupplied. Many folks here grow our own food. Without our livestock to back up the food supplies the wildlife here would have to be used for food even more than it is now. If there are food shortages, there will not only be hunting there will be large scale poaching. This proposal puts undue financial hardship on livestock owners, requires unneeded permitting which add to the work load of those who would oversee the permitting and enforcement of the new rules and regulations. Plus they would cause all types of issues without by not allowing the import of new genetics into the food line, Thus the interbreeding would cause inferior quality in the remaining animals. In some cases the families rely on the milk, wool, and meat. Some people are allergic to cow's milk and have to rely on goat milk. These requirements and regulations are unnecessary burdens and would be a doorway to stopping other animals and farming leaving us dependent on the lower 48 if they have not been shut down for farming as well.

378. Davina Stuart	Palmer, AK	I am one of many people in Alaska and the world who can not process traditional dairy. However sheep and goat milk based dairy is something I CAN tolerate and do well with. These things are hard enough to come by in Alaska, and are very expensive. If you pass this bill, it will make it more complicated, harder and more expensive for my family to find sheep and goat based products. You would be promoting un necessary hardships upon myself and myriad others with sometimes life threatening food allergies and intolerances. Please let Alaskans keep their sheep and goats.

416. Ellen Kane	Wasilla, AK	I've enjoyed raising a few sheep and goats for 23 years. It has been a good farming experience for myself and my grandchildren and has provided us with meat and wool. I am totally against Proposition 90. It is unnecessary, over-regulatory, and inappropriate for Alaska. Our farm animals are not free-roaming, but are contained on private land and never mix with the Dall sheep. The Dall sheep are minding their own business in the mountains.
417. Lara McGinnis	Ninilchik, AK	
418. Ashia Priest	Wasilla, AK	
419. Kelly Alvarado	Palmer, AK	I am disappointed in the Governments actions. Alaska was brought about by the Gold Rush and the Farming Pioneers . How can you demand testing done on goats and sheep if such testing is not even invented? People need these animals to survive, provide for others in wool, milk and even meat. Why does the government want to punish those that are helping themselves? Would they rather have them go on welfare?
