

RC089

My name is Corey Dalton. I am a licensed master falconer on Nevada. I was one of the 20+ people to put in for a tag in Alaska. I am in support of Proposal 92. However, I also do not think that all species should be included in the allocation. The species should be separate. Why should a person that wants a Gyrfalcon be in a lottery competition with another falconer that wants a peregrine or a goshawk?

I am also in support of Proposal 93. Eyaes take is permitted by non-residents in my state and there are no issues. I think that if an Alaskan Falconer can come to Nevada and get a eyas, I should be afforded the same right to take and eyas from Alaska.

Thank you for allowing me to comment.
