

PROPOSAL 92 – 5 AAC 85.025. Hunting seasons and bag limits for caribou; 85.045. Hunting seasons and bag limits for moose; and 92.072. Community subsistence harvest hunt area and permit conditions. Eliminate the community subsistence harvest hunts for moose and caribou as follows:

Repeal the current community subsistence harvest hunt for the Copper Basin area. Default back to the old general season moose hunt: September 1 through September 20, spike-fork, four brow tines, 50-inches. Increase the number of draw permit tags from the current allocation of five to 100 tags.

What is the issue you would like the board to address and why? Eliminate the community subsistence moose and caribou hunts.

Harvest and population data from ADF&G suggest that customary and traditional needs are being met for all qualified residents in Units 11,12, and 13. Those qualifying residents are allowed a 50-day hunting season for one federal subsistence "any bull" moose permit, plus two federal subsistence caribou permits for hunting in the four million acres of federal lands. Then you have a 20-day state general season moose hunt, with a spike-fork, 50-inches or four brow tines regulation, and a 40-day fall season for Tier I caribou hunters. In addition to this, Ahtna members have access to another 1.7 million acres of Ahtna private lands which provides exclusive use by Ahtna members to hunt.

All of this opportunity combined meets the intent of reasonable opportunity.
