

## Amendments for Proposal 115

We recommend the following amended language for proposal 115.

Do not add any permits for 2DK to the draw applications but instead designate the current non-resident permits DS237, DS232 and 1 of the DS240 Archery only permits to 2DK only.

The new hunt numbers would be DS337 for the Ship Creek area, DS332 for the Peters Creek area and DS340 for the area wide late archery hunt. These hunts would be available only to second degree of kindred applicants.

The remaining hunts DS224, DS230, DS231, DS233, DS236, DS238, DS241 and the remaining two DS240 would all be for guided hunters only.

By doing this you would designate 20% of the rifle hunts for 2DK only and 25% of the archery permits for 2DK only. In the last 3 years 2DK hunters have drawn 8 permits( see F&G comments for this proposal) and this would have given them 9 for the same period. The two rifle permits for the 2DK hunters are for the most accessible and popular units with the most permits available in Chugach State Park.

Passing this proposal as amended would stabilize the draws for both groups of hunters and is fair to both.
