

PROPOSAL 99

5 AAC 85.045. Hunting seasons and bag limits for moose.

Change the Tier II moose permit hunt (TM680) in Unit 19A to a household permit as follows:

People in the same household can hunt together. There is currently another area in the state where this occurs. Please use that language.

What is the issue you would like the board to address and why? The TM680 permit be modified from an individual permit to that of a “household permit”. We would like to modify the permit in order to reflect our traditional way of hunting as a group. It is important for elders to pass on knowledge to the younger generation and currently within the Tier II permit system that our area has, mentoring and hunting together is not allowed. We are not requesting an increase in number only that when hunting the permit issued contains each member of the household’s name on it. The licensed hunter needs to have the permit with them at the time of the hunt.

PROPOSED BY: Central Kuskokwim Fish & Game Advisory Committee (EG-F19-102)
