1

Current Regulations

Proposal 167

5 AAC 92.230. Feeding of game

(a) Except as provided in (b) of this section or under the terms of a permit issued by the department, a person may not

(1) negligently feed a moose, deer, elk, sheep, bear, wolf, coyote, fox, wolverine, or deleterious exotic wildlife, or negligently leave human food, animal food, mineral supplements, or garbage in a manner that attracts these animals;

(2) intentionally feed a moose, deer, elk, sheep, bear, wolf, coyote, fox, wolverine, or deleterious exotic wildlife, or intentionally leave human food, animal food, mineral supplements, or garbage in a manner that attracts these animals.

(b) The prohibitions described in (a) of this section do not apply to the use of bait for trapping furbearers or deleterious exotic wildlife, or hunting bears under 5 AAC 92.044, or hunting wolf, fox, or wolverine with bait as described in 5 AAC 92.210, and elsewhere under 5 AAC 84 5 AAC 92.

Proposed Regulation

Proposal 167

5 AAC 92.230. Feeding of game

(a) Except as provided in (b) of this section or under the terms of a permit issued by the department, a person may not

(1) negligently feed a moose, deer, elk, sheep, bear, wolf, coyote, fox, wolverine, **dog, cat**, deleterious exotic wildlife, **or wild birds from April 1 to September 30**, or negligently leave human food, animal food, mineral supplements, or garbage in a manner that attracts these animals;

(2) intentionally feed a moose, deer, elk, sheep, bear, wolf, coyote, fox, wolverine, **dog, cat**, deleterious exotic wildlife, **or wild birds from April 1 to September 30**, or intentionally leave human food, animal food, mineral supplements, or garbage in a manner that attracts these animals.

(b) The prohibitions described in (a) of this section do not apply to the use of bait for trapping furbearers or deleterious exotic wildlife, or hunting bears under 5 AAC 92.044, or hunting wolf, fox, or wolverine with bait as described in 5 AAC 92.210, and elsewhere under 5 AAC 84 5 AAC 92.

(c) It is an affirmative defense to a prosecution for illegal feeding under this section that the food placed outside to feed dogs and cats or to attract birds is in a feeder that is designed, reinforced, enclosed, mounted or suspended in such a fashion that prevents a wild or deleterious exotic animal listed in (a) from consuming the food, or any animals from spilling the food so that it can be consumed by a wild or deleterious exotic animal listed in (a).

3

3

Proposal 167

- 5 AAC 92.230 establishes regulations prohibiting the negligent feeding of specific Alaska wildlife species.
- This regulation is intended to reduce human/wildlife conflicts which have both a public and wildlife safety component.
- Many communities have promulgated ordinances addressing household trash, putrescible waste, and other attractants.
- Should wildlife feeding and attractant issues continue or escalate, 5 AAC 92.230 can be used to address the concern.
- The status of ordinances statewide that prohibit the feeding wild birds is unknown. However, wild bird food (e.g., seed, corn, suet) can be wildlife attractants and can be addressed by local ordinance, or 5 AAC 92.230 if necessary.
- Staff produce education material to hand out; go door to door answering wildlife questions and providing suggestions; attend community events to provide wildlife information and suggestions; and have taken advantage of virtual presentation options to reach a wide audience.

5

Proposal 168

Prohibit the Board of Game from creating new nonresident hunts that will require a guide for moose, caribou, and black bear for allocation.

Department Recommendation: Neutral

Public Proposal

6

6

Proposal 168

Sec. 16.05.407. Nonresident hunting big game animals must be accompanied.

(a) It is unlawful for a nonresident to hunt, pursue, or take brown bear, grizzly bear, mountain goat, or sheep in this state, unless personally accompanied by

(1) a person who is licensed as

(A) a registered guide outfitter or a master guide outfitter under AS 08.54 and who is providing big game hunting services to the nonresident under a contract with the nonresident; or

(B) a class A assistant guide or an assistant guide under AS 08.54 and who is employed by a registered guide outfitter or a master guide outfitter who has a contract to provide big game hunting services to the nonresident; or

(2) a resident over 19 years of age who is

(A) the spouse of the nonresident; or

(B) related to the nonresident, within and including the second degree of kindred, by marriage or blood.

7

7

Proposal 168

- The board has allocated hunting opportunities in various locations for moose, caribou, and black bear hunters by guide-type, in addition to the statutory requirements for brown/grizzly bear, goats, and sheep noted in AS 16.05.
 - Southeast black bear (Units 1, 2, 3)
 - Kodiak brown bear
 - Interior moose (Units 21, 23, 24)
 - Tok Management Area sheep
- These allocations are for opportunity and not to require guides for species outside the board's authority.
- The proposal seeks to not allow any additional hunts allocated between nonresident hunters but does not request changes to the current hunts where the allocation has been made.

8

8

Proposal 168

Prohibit the Board of Game from creating new nonresident hunts that will require a guide for moose, caribou, and black bear for allocation.

1
2

12

Background **Proposal 169**

- Extremely difficult to establish how white an animal must be to be prohibited for take.
- The department manages for populations. White pelage is usually limited to an individual animal.
- Protecting an individual animal, or small group of animals is difficult.
- There are areas that restrict the harvest of white animals (e.g., British Columbia).
- Cultural beliefs and traditions may teach to avoid harvesting white animals.

14

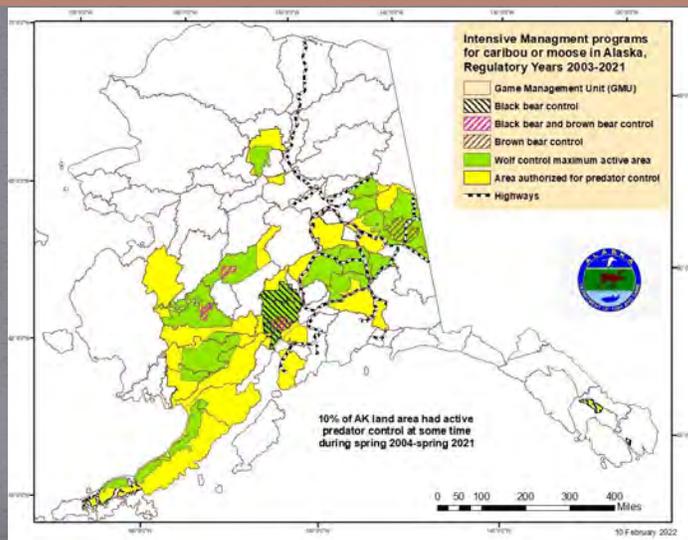

Proposal 247

Prohibit lethal removal of wolves in Intensive Management (IM) programs.

- Recommendation: Oppose
- Public Proposal

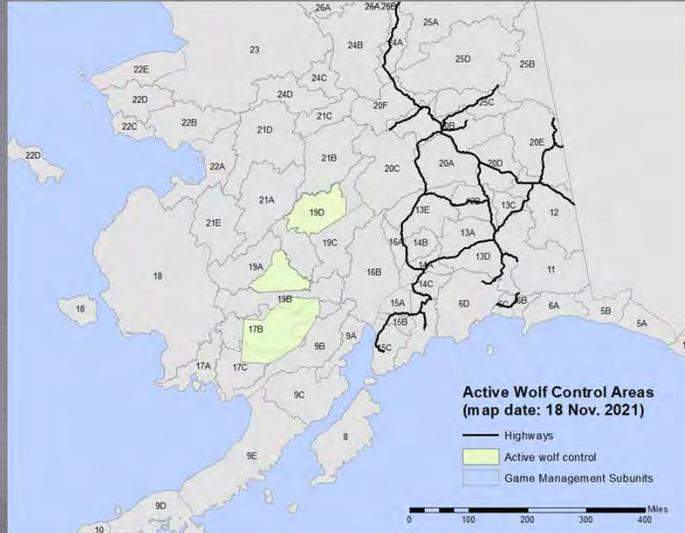

15

Proposal 247

16

Proposal 247

17

17

Background

Proposal 247

In 1994 the Alaska Legislature passed Alaska Statute 16.05.255 (e) (g) and (k) for caribou, deer, and moose (game or prey species) that required the Alaska Board of Game to:

- set lower and upper prey population and harvest objectives in areas important to hunting.
- Consider active management of predation and habitat when prey abundance and harvest are below IM objectives and harvest restrictions are proposed.
- Consider feasibility based on science, land ownership, and subsistence uses (e.g., effect of increased number of hunters or more hunting opportunity on local users) before authorizing programs.

18

18

Background

Proposal 247

- The merits of predator control are regularly debated and are subject to both empirical data and value judgements.
- AS 16.05. 255 (e) (g) and (k) mandates the board adopt regulations for IM programs to restore the abundance and productivity of identified big game prey populations...
- 5 AAC 92.106 establishes criteria for big game prey populations (moose, caribou, and Sitka black tailed deer).
- 5 AAC 92.108 establishes IM findings for prey populations; and establishes population and harvest objectives for those populations with positive findings.
- 5 AAC 92.110 provides regulatory requirements for wolf control.

19

19

Background

Proposal 247

- Lethal wolf removal is an important IM tool
 - Guided by population and removal thresholds
 - Monitored annually
 - Efficient
- Without the ability to lethally remove wolves in Intensive Management areas the department will be significantly hindered in meeting board approved IM objectives and place the Department and Board in a position where it will be hindered in implementing Alaska Statute 16.05.255 (e) (g) and (k).

20

20

Proposal 247

Prohibit lethal removal of wolves in Intensive Management (IM) programs.

- Recommendation: Oppose
- Public Proposal

21

21

Proposal 248

Public Proposal

Allow nonresidents aged 10-17, that have Hunter Ed, to hunt on behalf of a permit holder who is at least 18 years of age, under the direct immediate supervision of that permit holder.

Department Recommendation: Neutral

22

22

Background

Proposal 248

5 AAC 92.003

... a [RESIDENT] hunter who is 10 through 17 years of age at the start of the hunt, and has successfully completed a certified hunter education course, is allowed to hunt on behalf of a permit holder who is at least 18 years of age, under the direct immediate supervision of that permit holder, who is responsible for ensuring that all legal requirements are met.

- Proposal 248 would allow nonresident youth to hunt on behalf of both nonresident and resident permit holders.

23

23

Background

Proposal 248

Opportunities for youth hunters:

- Residents 10-17 hunting on behalf of a resident permit holder.
- Youth hunts, open to those 10-17, if the youth is a nonresident, the accompanying adult must be a resident and the parent, stepparent, or legal guardian of the youth hunter.
- Hunters under the age of 10 do not have their own bag limit for big game, and must hunt on behalf of an adult age 18 or older (not residency specific).

24

24

Proposal 248

Public Proposal

Allow nonresidents aged 10-17, that have Hunter Ed, to hunt on behalf of a permit holder who is at least 18 years of age, under the direct immediate supervision of that permit holder.

Proposal 171

GMU Boundary

Regulatory History

Proposal 171GMU Boundary**Regulatory History**

- RM640 moose hunt
 - Lasted 2 years
 - About 1,000 permits issued each year
- Continuing disagreement within CKAC about moose hunting
- Representatives from western villages wanted to maintain hunting while representatives from eastern villages favored a closure

39

39

Proposal 171GMU Boundary**Regulatory History**

- March 2006 BOG established a tier II hunt (TM680) in western 19A (downstream of and including the George River drainage, and downstream of and excluding Downey Creek.
- Lime Village Management Area remained open (TM684) and the remainder of 19A was closed.

40

40

Proposal 171

GMU Boundary

Regulatory History

- Joint Board of Fisheries and Game BOG passed proposal 17 in 2007.
- Created new CKAC (Lower Kalskag, Kalskag, Aniak, Chuathbaluk and Crooked Creek)
- Created SHAC (Red Devil, Sleetmute, Stony River and Lime Village)

41

41

Proposal 171

GMU Boundary

Amounts Necessary for Subsistence

Positive C&T determination and ANS

- Unit 19 outside the LVMA 400-700 moose including:
 - 175-225 in Unit 19A
 - 20-24 in Unit 19B
- 30-40 in the LVMA portion of 19A

42

42

Proposal 171 GMU Boundary

Intensive Management

- **2004** wolf predation control plan in 19A and 19B
- **2006** revised to include just 19A
- **2009** reauthorized in just eastern 19A
- **2012** amended to include department conducted bear control
- **2014** reauthorized for 6 years
- **2020** reauthorized for 6 years

43

43

Proposal 171 GMU Boundary

Intensive Management

19A and 19B IM Harvest Objective 750 – 950 Moose
19A and 19B Harvest RY21 200 Moose

45

45

Proposal 171 GMU Boundary

Major Points

- This split is primarily about moose management
- Split is aligned with current moose hunt boundaries
- No hunting or trapping regulations would change

46

46

Proposal 171

GMU Boundary

Major Points

- Will require changes to ANS and IM objectives
- There will be several administrative challenges
 - Will require changing the harvest data base
 - Changes to the reg book
- ACs feel split will give them more autonomy

Boundary Change – 266-1

49

GMU Boundaries and
Guide Use Area
Boundaries in Units
24D and 21C/D

50

GMU Boundary Change

- The FWS' original concern was based on outdated boundary information.
- Current State and Federal Guide Use Areas (GUAs) are aligned; therefore, a change is not needed.
- Even if Federal and State GUAs boundaries were not aligned, State regulations allow a guide to have an additional State GUAs. [AS 08.54.750(d)/12 AAC 75.230(c)]
- The proponent has asked for the proposal to be withdrawn and agrees that the change is not needed.
