

PROPOSAL 80

5 AAC 92.061. Special provisions for brown bear drawing permit hunts.

Adjust the allocation for Unit 8 brown bear permit hunts, DB101 - DB193, as follows:

Any Kodiak hunt draw permit area DB101 - DB193 cannot be allocated over the current average .35% of the tags in an individual hunt.

What is the issue you would like the board to address and why? The tag allocation in hunt areas DB101-DB193 is not close to equal amongst each area. The distribution is between 20%-44%. Why the disparity? The allocation of some areas need to go up and others need to go down to get them closer to equal to distribute the resident and nonresident tag allocation more equal.
