

I observed the discussion via YouTube pertaining to proposal 82 and am very concerned that the sentiments of many commenters, ADFG themselves and my repeated comments about creating an overlap with the archery area were not addressed. I have hunted that area three times for sheep, once on my own DS141 tag and twice with friends who had drawn it and I spent a lot of time observing sheep in there. From what I can tell most of the rams in in East Fork are concentrated right on the edge of the the DS141 (archery draw tag) boundary. If this new allocation brings rifle hunters in that area, **bow and rifle hunter will essentially be hunting different sides of the same ridge.** This is dangerous and will only increase the already perceived crowding in DS141. Please reconsider carrying this proposal and either OPPOSE or carry with the amendment that the new area be included in DS141/241.
