

Record Copy–Board of Game
Perry Burress, Unalakleet & Council
January 2024

For the following units, 1) make them controlled use areas–closed to use of aircraft for moose hunting, including transportation of moose hunters, their hunting gear, and parts of moose, and 2) require hunters to buy tags locally between July 1st and 15th (this will limit what the guides can do; they already have similar regulations in place in parts of Units 18 and 21):

Unit 18, Headwaters of Andrefsky & Atchuelinguk Rivers

Reason: Impacting moose migration to Unalakleet River drainages south and RM841

Unit 21, Headwaters of Anvik River & Yellow River

Reason: Impacting moose migration to Unalakleet River drainages south

Unit 22A Remainder

Reason: IMpacting Unalakleet River drainage moose migration

Proposal 18: I am against this one as I have been told by a pilot who has frequented the area in recent years that the herd population is small.

Proposal 22: Make this a 27 or 30 caliber minimum for moose and bear (.270, .308. .30-06, etc.)

Proposal 26: I am against this proposal.
