

Mr. Chairman, Members of the Board(s) and Commissioner, I would like to submit a record copy to highlight suggestions due to the inability for ACR's during Joint Board meetings.

First would be a timeline for comments due from the department. This would simply look like the following criteria:

-All department comments due 60 days before the respective meeting in which the particular Board of Fish and Board of Game meeting is to be held.

-Data retrieved/discovered after 60 days could be submitted much like a record copy "inbox" from the 60 day deadline to the start of the meeting. This would be considered a "department record copy inbox".

These methods would allow Advisory committees plenty of time to coordinate meetings around department comments and submit minutes on time. This also would allow for reconsideration if substantial information was created/retrieved from the department via the "department record copy inbox" that would be available on the website just like the regular department comments are posted.

Second would be an "encrypted" requirement for proposals being submitted to the board.

- This would look much like the online submission form with red asterisks that requires particular information before submission, except the regulation code and regulation change would be required in a red asterisk box.

This would make the proposal process much more efficient as every proposal could be more clearly defined and understood and not lead to misunderstood interpretation of the proposal language. The ability to submit the proposal in whole through a word document would be allowed, but the all caps, bold/underlined and bracketed information would be necessary for the proposal to be officially submitted.

Sincerely,

Herb Mansavage

Submission
