					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

Location 1. ARR bridge (shown on attached map). 61.91304 x 150.05633. Baited minnow traps (2) yielded two Burbot and one king juvenile 95mm long after 3 days soak time. Number of beaver dams downstream and up. Traps were placed in beaver pond.

Location 2. Road from mile 82 parks highway (shown on map), 61.09569 x 150.06229. One baited minnow trap yielded one King juvenile 145 m long after one hour soak time.

Stream E channel type in wide floodplain. Channel 3 m wide by 1 meter deep. Moderate velocity 1 to 2 fps.
