IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments

I used a GPS to correct the arc location for Peterson Creek upstream to the end of the specified reach and moved the existing mouth point downstream to about mean low low water line (Figure 1). Please update the AWC.
