**Findings:** I conducted a foot survey of Eagle Creek during a routine fishpass inspection. I began the survey at the old road crossing just above the estuary and concluded approximately 0.3 river miles above the fishpass. Adult steelhead were only observed at one location (Table 1; Figures 1 and 2). There were nine steelhead present, several of which can be seen in Figure 3.

Table 1. 113-62-10050 observation data.
