OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	07/15/2022		✓		✓
Dolly Varden	07/15/2022		✓	✓	
cutthroat trout	07/15/2022		✓	✓	

~ADD new AWC Stream #114-31-10130-2061 with COHO salmon REARING.

Comments:

Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon.
Coordinates (Lat,Long): Upper(57.969217,-135.442334) Lower(57.968789,-135.446267)

114-31-10130 Tributary 13

ADDITION

Water body name:

Quad: Sitka D-5

Upper Reach Latitude: 57.969217 **Longitude:** -135.442334

Lower Reach Latitude: 57.968789 **Longitude:** -135.446267

Survey date: 7/15/2022

Species & Lifestage:

Survey crew: FC, RR

Findings: We surveyed this uncataloged stream using a backpack electrofisher and GPS. We captured juvenile coho salmon, Dolly Varden, and cutthroat trout. Channel erosion at the base of a tree has formed a 3 ft diameter hole, which likely constitutes a temporary barrier to fish passage (Table 1; Figures 1–3).

Recommendations: Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon (Figure 4).

Nomination: Pending

Table 1.—114-31-10130 tributary 13 survey data.

Waypoint	Latitude	Longitude	Notes	Stream Width ft	Stream Substrate	Habitat Features	Gradient %	Sample Effort	Sample Results
1088	57.968818	-135.446347	Confluence with river-right tributary; advancing upstream tributary.	8-10	Large Gravel Small Gravel		1-2	Not Fished	
1089	57.968767	-135.445901	Residential fish capture.					EF	2 DV 1 CT
1090	57.968900	-135.445693	Young-of-year CO capture.	6-8	Large Gravel Small Gravel		2-4	EF	2 CO 3 DV 1 CT
1091	57.968954	-135.443169	Confluence of main tributary with river-left tributary.					EF	
1097	57.969485	-135.441813	Resident fish capture.	6-8	Large Gravel Small Gravel		2-4	EF	4 DV 1 CT
1098	57.969548	-135.441379	Increase in gradient compared to downstream. Channel becoming more incised with lots of large woody debris. Resident fish capture.	6-8	Large Gravel Small Gravel		4-6	EF	3 DV 2 CT
1099	57.969588	-135.440931	Channel increasingly incised and overgrown with dense vegetation; becoming impractical to advance/survey via electrofishing. Only resident fish capture since last few waypoints; end of survey on tributary.			Incised Channel LWD			

Table 1.—Continued.

Waypoint	Latitude	Longitude	Notes	Stream Width ft	Stream Substrate	Habitat Features	Gradient %	Sample Effort	Sample Results
1100	57.969288	-135.442216	Water circles around and flows into ~3' diameter hole near base of tree and downed woody debris. Falls from surface to pool below hole is 18-24". Stream then flows subsurface for at least 30-40' and reappears downstream, seemingly from multiple underground outlets. Seems to constitute temporary but significant barrier to fish passage.			Log Jams LWD		EF	No Fish
1101	57.969290	-135.442440	Young-of-year CO capture. Stream goes subsurface for ~30-40' upstream of here (see upstream waypoint).	4-6	Large Gravel Fine Organic		4-6	EF	3 CO 2 DV
