Date: Thursday, September 28, 2023 11:07:18 AM

Hi Joe,

Another thing I noticed which ties into a change I had made in 2019 is that 101-71-10040-2015-3009 is named "Clear Falls Creek".. In 2019 I noticed it had the name Butler Creek which was the next stream upriver so we got that updated and it's right in the AWC now, but 3009 is named Clear Falls Creek. I am also just now noticing that 3009 doesn't list kings. It has been a Chinook index stream for our Chinook Research program for the past 30 years and kings spawn there annually. Should I do an entire nomination to get kings added to Clear Falls Creek (3009)? Thanks!

Nathan

Hi Nathan,

Yes I will add that to my list of minor revisions to include in the next update.

Thanks,

Joe Giefer

Hi,

I've been sampling and working on Leduc Creek for over a decade and have only know it as that. I noticed on the tag lab it said "not named" so when I checked they said it's because it doesn't have a name in the AWC. Leduc Creek comes out of Leduc Lake and drains into Leduc River. Can we add "Leduc Creek" as the name for 101-71-10040-2015-3003? Let me know if there's anything you need from me in order to make this happen. Thanks!
