## 113-51-10040 Tributary 8

## ADDITION

**Water body name:**

**Quad:** Sitka C-4

**Upper Reach Latitude:** 57.549624 **Longitude:** -135.131427

**Lower Reach Latitude:** 57.549248 **Longitude:** -135.132615

**Survey date:** 8/4/2023

**Species & Lifestage:**

**Survey crew:** NJ, FC

**Findings:** We surveyed this uncataloged stream using baited minnow traps and GPS and captured juvenile coho salmon, cutthroat trout, and Dolly Varden. Traps were set above and below the corrugated metal pipe that crosses the road. The pipe had no blockage and had a large pool at the inlet (Table 1; Figures 1–3). Fish habitat likely continues upstream; recommend future investigation to find the upper extent of this tributary.

**Recommendations:** Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon up to waypoint 438 (Figure 4).

**Nomination:** Pending

Table 1.—113-51-10040 tributary 8 survey data.

Waypoint	Latitude	Longitude	Notes	Stream Width ft	Stream Substrate	Habitat Features	Gradient %	Sample Effort	Sample Results
438	57.549586	-135.131322	Newer looking pipe. Pool at inlet upstream. No blockage seen in pipe.		Fine Organic Large Gravel	Large Pool	1-2	MT	2 CO 4 DV 1 CT
