ADDITION

Water body name: Swift Creek

Survey date: 8/4/2023

Quad: Sitka C-4

Species & Lifestage: COp, Pp

Upper Reach Latitude: 57.560318 **Longitude:** -135.191228

Survey crew: NJ, CD

Lower Reach Latitude: 57.536978 **Longitude:** -135.180454

Findings: We surveyed this cataloged stream using a backpack electrofisher and GPS and captured juvenile coho salmon, cutthroat trout, and Dolly Varden. This clearwater stream has intermittent large woody debris and small log jams throughout. Further upstream, the channel becomes more incised as the gradient increases (Table 1; Figures 1–4).

Recommendations: Extend upper extent of Stream No. 113-51-10040-2005 in the anadromous waters catalog up to waypoint 576 and add rearing coho salmon to species (Figure 5).

Nomination: Pending
