Survey crew: DK, NJ

Findings: We surveyed this uncataloged stream using baited minnow traps and GPS and captured juvenile coho salmon and threespine stickleback. This stream extends up from the main channel of 113-59-10070 into a grassy muskeg where it then branches into multiple tributaries, only one of which was trapped due to time constraints. Water levels were low but high enough to set minnow traps near the road (Table 1; Figures 1, 2).

Recommendations: Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon up to waypoint 628 (Figure 3).

Nomination: Pending
