Southeast Region

113-59-10070 Tributary 6

ADDITION

Water body name:

Quad: Sitka C-4

Upper Reach Latitude: 57.594796 **Longitude:** -135.090615

Lower Reach Latitude: 57.594439 **Longitude:** -135.091142

Survey date: 8/6/2023

Species & Lifestage:

Survey crew: DK, NJ

Findings: We surveyed this uncataloged stream using a backpack electrofisher and GPS and visually identified dozens of juvenile coho salmon; no photos of coho salmon were taken due to the fish being visually identified in the water. This stream has low water with fine organic bedload material and turns into a wetland complex further upstream (Table 1; Figure 1). Stream survey ended due to time constraints; fish habitat likely continues upstream.

Recommendations: Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon up waypoint 609 (Figure 2).

Nomination: Pending
