**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. **Attach a copy of a map showing location of mouth and observed upper extent of each species,** as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Aerial surveys have been conducted on this system since the 1970's and observers have noted the presence of **pink and coho salmon**, which has been published in our ADF&G Annual Salmon Management Reports (AMR). Data can be found in RBASE.

Please add pink and coho salmon.
