This report was compiled from data collection funded through Alaska Fisheries Information Network (AKFIN), Task II: Groundfish/Shellfish Fisheries Data collection and Analysis in Alaska, NOAA Cooperative Agreement NA18NMF4370300.

The Fishery Management Report series was established in 1989 by the Division of Sport Fish for the publication of an overview of management activities and goals in a specific geographic area and became a joint divisional series in 2004 with the Division of Commercial Fisheries. Fishery Management Reports are intended for fishery and other technical professionals, as well as lay persons. Fishery Management Reports are available through the Alaska State Library and on the Internet: <http://www.adfg.alaska.gov/sf/publications/>. This publication has undergone regional peer review.

Product names used in this publication are included for completeness and do not constitute product endorsement. The Alaska Department of Fish and Game does not endorse or recommend any specific company or their products.

ABSTRACT

This report summarizes harvest, effort, and management of commercial state-waters and parallel groundfish fisheries managed by the Alaska Department of Fish and Game (ADF&G) in the Bering Sea-Aleutian Islands Area (BSAI). State-waters groundfish fisheries included in this report are sablefish *Anoplopoma fimbria*, black rockfish *Sebastes melanops*, dark rockfish *S. ciliatus*, Pacific cod *Gadus macrocephalus*, and key parallel fisheries. For parallel fisheries in the BSAI, ADF&G adopts most seasons, bycatch limits, and allowable gear types in the adjacent exclusive economic zone established by the National Marine Fisheries Service.

Keywords: Bering Sea-Aleutian Islands Area, Bering Sea District, Aleutian Islands District, Dutch Harbor Subdistrict, BSAI, sablefish, *Anoplopoma fimbria*, black rockfish, *Sebastes melanops*, parallel season, Exclusive Economic Zone, EEZ, National Marine Fisheries Service, NMFS, Pacific cod, *Gadus macrocephalus*, dark rockfish, *Sebastes ciliatus*

INTRODUCTION

Commercial groundfish fisheries within state waters (0–3 nmi) are managed by the Alaska Department of Fish and Game (ADF&G) under regulations developed by the Alaska Board of Fisheries (BOF). Commercial groundfish fisheries in the exclusive economic zone (EEZ; 3–200 nmi) off Alaska are managed by the National Marine Fisheries Service (NMFS) under guidelines developed by the North Pacific Fishery Management Council and the Magnuson-Stevens Fishery Conservation and Management Act (DOC 2007).

Many commercially important groundfish species occur in both state waters and the EEZ. Each year, ADF&G issues an emergency order that establishes parallel groundfish seasons in state waters, adopting federal regulations except when superseded by state regulations, including season dates, gear types, bycatch limits, and inseason management actions in adjacent EEZ fisheries managed by NMFS. Harvest in a parallel fishery is accounted for under federal catch limits. ADF&G and NMFS coordinate state and federal closed waters for Steller sea lion and coral garden protection areas.

The Bering Sea-Aleutian Islands Area (BSAI) includes all state waters of the Bering Sea and waters of the North Pacific Ocean adjacent to the Aleutian Islands west of 170°W long. The BSAI is further divided into districts: the Bering Sea and Aleutian Islands Districts (Figure 1). Each state-waters groundfish fishery has unique fishery management boundaries described in this report. ADF&G actively manages 4 state-waters groundfish fisheries in the BSAI: Aleutian Islands sablefish *Anoplopoma fimbria*, Aleutian Islands black rockfish *Sebastes melanops*, Aleutian Islands Subdistrict Pacific cod *Gadus macrocephalus*, and Dutch Harbor Subdistrict Pacific cod.

Groundfish fishery harvests in this report are based on the ADF&G fish ticket database as of May 2025. Fishery average prices in this report are based on initially reported exvessel prices. For more detailed information on fishery value and prices, refer to the ADF&G Commercial Operator’s Annual Report.¹

¹ Commercial Operator’s Annual Report (COAR). Unpublished. Statewide COAR Production by Area for the 2024 season. Alaska Department of Fish and Game, Juneau. https://www.adfg.alaska.gov/index.cfm?adfg=fishlicense.coar_production_byarea.

SECTION I: ALEUTIAN ISLANDS GROUND FISH FISHERIES

ALEUTIAN ISLANDS SABLEFISH

The Aleutian Islands state-waters sablefish fishery includes state waters of the Aleutian Islands District of the BSAI and the Western District of the South Alaska Peninsula Area south of the latitude of Cape Sarichef (54°36'N lat) and west of the longitude of Scotch Cap Light (164°44'W long; Figure 2).

BACKGROUND

The federal individual fishing quota (IFQ) program for sablefish was established in 1995. The Alaska Department of Law determined harvest of sablefish in state waters could not be limited to IFQ holders; therefore, state-waters sablefish fisheries were established in areas where historical harvest of sablefish was sufficient to allow for a manageable fishery. All vessels harvesting sablefish in state waters must be registered with ADF&G, including those vessels harvesting IFQ or Community Development Quota sablefish. All harvest taken from state waters accrue to the guideline harvest level (GHL), regardless of whether harvest is accounted for in a federal fishery.

ADF&G annually reviews the NMFS sablefish stock assessment and sets the Aleutian Islands state-waters sablefish GHL at 5% of the combined federal BSAI allowable biological catch. Season dates for the state-waters fishery coincide with the federal IFQ season to allow for sablefish harvest inside state waters during the IFQ fishery (Table 1). Longline, pot, mechanical jigging machine (jig), and hand troll are legal gear types. From 1995 to 2019, vessels using longline gear accounted for the majority of the harvest. Beginning in 2020, vessels have mostly fished with pot gear (Table 2). Pot gear became the dominant gear type in the state-waters fishery, probably due to federal regulation changes allowing halibut retention in pot gear in the BSAI, whale interactions, and the increasing use of slinky pots. Although trawl is not a legal gear type, bycatch in trawl fisheries has accounted for a small portion of the removals since 1995.

The GHL was achieved annually from 1996 through 2002 and from 2022 through 2023, but was not fully harvested from 2003 to 2021 and in 2024. Total fishery value peaked in 2023 at \$2.22 million (Table 1). For more history on regulation changes and fishery effort for the Aleutian Islands sablefish fishery, refer to the 2017 BSAI annual management report (Beder and Shaishnikoff 2018).

2024 FISHERY

The 2024 Aleutian Islands state-waters sablefish GHL was 2,706,000 pounds, an increase of 42% from the 2023 GHL, and the largest in the history of the fishery (Table 1). The season opened on March 15, concurrent with the IFQ season, and closed on December 7. Fishery harvest was 845,950 pounds taken by 16 vessels (Table 1). Longline vessels harvested 47,030 pounds, and pot vessels harvested 798,920 pounds. There was no incidental catch by trawl vessels during the 2024 fishery (Table 2). Participants in federal IFQ/Community Development Quota fisheries accounted

for 19% of the harvest compared to 15% in 2023. Average exvessel price was \$1.47 per pound for an estimated exvessel value of \$795,372 (Table 1).

ALEUTIAN ISLANDS BLACK ROCKFISH

The Aleutian Islands black rockfish fishery includes state waters of the Aleutian Islands District of the BSAI and the Western District of the South Alaska Peninsula Area south of the latitude of Cape Sarichef (54°36'N lat) and west of the longitude of Scotch Cap Light (164°44'W long; Figure 3). The fishery is further divided into the Akutan, Unalaska, and Western Sections (Figure 4).

BACKGROUND

In 1998, the North Pacific Fishery Management Council passed Amendment 46 to the Gulf of Alaska (GOA) groundfish Fishery Management Plan (FMP), removing black rockfish from the GOA FMP, and thereby delegating management in the GOA EEZ to the State of Alaska. Black rockfish in the BSAI EEZ remain under federal management. The Aleutian Islands black rockfish fishery occurs in state waters south of Cape Sarichef and west of Scotch Cap Light. Federal waters of the Pacific Ocean between Scotch Cap Light and 170°W long are also managed by ADF&G as a bycatch fishery. Starting in 2000, the Akutan and Unalaska Sections were divided into subsections, each with a separate GHL to distribute fishing effort (Figure 4). Since 2000, state waters south of Akutan Island between 165°41'W long and 165°46'W long (the south end of Green Bight to Talus Point) have been closed to the retention of black rockfish due to concerns of localized depletion. Due to a lack of participation in the fishery, this area was reopened in 2023, and all subsections were removed in 2024.

The Aleutian Islands black rockfish fishery opens January 1 and closes December 31, unless closed earlier by emergency order. Harvesters may use mechanical jig or hand troll gear with a limit of 5 mechanical jigging machines per vessel. Harvesters are required to register with ADF&G prior to fishing and must complete a logbook for directed black rockfish fishing activity.

Minimal directed effort for black rockfish has occurred in recent years, with most of the harvest coming from bycatch incidental to other fisheries each year (Table 3). For more history on regulation changes and fishing effort for the Aleutian Islands black rockfish fishery, refer to the 2017 BSAI groundfish annual management report (Beder and Shaishnikoff 2018).

2024 FISHERY

The 2024 Aleutian Islands black rockfish GHL was 90,000 pounds; 35,000 pounds were available in both the Akutan and Unalaska Sections and 20,000 pounds were available in the Western Section.

The 2024 Aleutian Islands black rockfish fishery opened on January 1 and closed on December 31. No directed harvest occurred. Harvesters may retain up to 20% black rockfish as bycatch from other directed state waters and federal groundfish fisheries. Eleven vessels incidentally retained black rockfish in 2024 for a total of 831 pounds (Table 3).

ALEUTIAN ISLANDS DARK ROCKFISH

In 2009, Amendment 73 was added to the BSAI groundfish FMP, and Amendment 77 was added to the GOA groundfish FMP (NOAA 2008), which removed dark rockfish from the federal FMPs,

thereby extending the State of Alaska’s authority for dark rockfish in the EEZ of both the BSAI and GOA. In the BSAI, there is no directed dark rockfish fishery. Bycatch of dark rockfish is limited to 20% of the directed target species onboard a vessel. Dark rockfish incidental harvest in 2024 totaled 10,175 pounds, primarily from trawl groundfish bycatch in BSAI federal waters.

ALEUTIAN ISLANDS SUBDISTRICT STATE-WATERS PACIFIC COD

The Aleutian Islands Subdistrict (AIS) state-waters Pacific cod fishery includes state waters of the Aleutian Islands District west of 170°W long, with an inner Adak Section that includes state waters between 175°W long and 178°W long (Figure 5).

BACKGROUND

Prior to 2006, Pacific cod harvest in the Aleutian Islands District was exclusively managed under parallel rules. In February 2006, the BOF approved regulations for a state-waters Pacific cod fishery in the AIS west of 170°W long (Figure 5, Appendix A). The *Aleutian Islands Subdistrict Pacific Cod Management Plan* (5 AAC 28.647) was adopted by emergency petition to provide the community of Adak with economic opportunities. Regulatory changes to the AIS state-waters Pacific cod fishery from 2006 through 2024 are provided in Appendix A.

In 2019, the AIS state-waters Pacific cod GHL was established at 31% of the federal Aleutian Islands subarea allowable biological catch (ABC), with a step-up provision increasing the GHL by 4% each subsequent year the GHL is achieved, up to a maximum of 39%. Additionally, if the GHL is not achieved for 2 consecutive years, the GHL will decrease by 4% each following year, down to a minimum of 15% of the federal Aleutian Islands ABC. The AIS state-waters Pacific cod GHL was not achieved in 2022 and 2023; therefore, the 2024 GHL was set at 35% of the ABC. From 2006 to 2024, AIS state-waters Pacific cod GHLs ranged from 10.5 million pounds to 20.8 million pounds (Table 4).

Since its inception, the AIS Pacific cod fishery has been generally underutilized, with the GHL being achieved 6 of the past 19 years (2007, 2008, 2018, 2019, 2020, and 2021). During the years when the GHL was not achieved, approximately 50% of the GHL remained unharvested, except in 2022 and 2023, when less than 25% of the GHL remained unharvested. Years when the GHL was fully harvested generally correspond to periods when a shore-based processor was operational in Adak. Vessels using longline, trawl, pot, and jig gear have historically been eligible to participate in the fishery, and the GHL is not allocated by gear type, except that pot vessels over 60 feet are restricted to harvesting no more than 25% of the GHL. Participation has fluctuated over time, with only trawl or pot gear vessels participating in 4 of the last 5 years (Table 5). The number of vessels, along with vessel size for each gear type, has varied since 2006, with a general shift toward under 60-foot overall length (OAL) pot gear vessels in recent years.

Prior to 2016, the AIS state-waters Pacific cod GHL was divided across 2 seasons: “A” season (before June 10) and “B” season (after June 10). Since 2016, the AIS state-waters Pacific cod fishery has been managed as 1 season. Prior to 2020, the AIS state-waters Pacific cod fishery was a nonexclusive registration area for all gear types. In December 2019, the BOF approved regulations for the AIS to be an exclusive registration area for all gear types. This regulation became effective during the 2020 season (Appendix A).

2024 FISHERY

The AIS state-waters Pacific cod 2024 GHl was 9,591,800 pounds (Table 4). The state-waters fishery opened on January 1 in the Adak Section to vessels 60 feet or less OAL using trawl, pot, and jig gear, and vessels 58 feet or less OAL using longline gear (Tables 5 and 6). All state waters west of 170°W long opened on February 1 at 12:00 PM to pot vessels 100 feet or less OAL, trawl and jig vessels 60 feet or less OAL, and longline vessels 58 feet or less OAL. No harvest occurred in 2024, and the fishery closed on December 31 (Tables 4, 5, and 6).

SECTION II: BERING SEA GROUND FISH FISHERIES

DUTCH HARBOR SUBDISTRICT STATE-WATERS PACIFIC COD

The Dutch Harbor Subdistrict (DHS) includes state waters of the Aleutian Islands District east of 170°W long and the state waters of the Bering Sea District that are west of 162°30'W long, east of 170°W long, and south of 55°30'N lat, with closed waters south of 53°06.11'N lat (Figure 6).

BACKGROUND

The DHS state-waters Pacific cod fishery for pot gear was established by the BOF in October 2013 and opened for the first time in 2014 under regulations in the *Dutch Harbor Subdistrict Pacific Cod Management Plan* (5 AAC 28.648). The DHS state-waters Pacific cod fishery for jig gear was established by the BOF in October 2018 and opened for the first time in 2019. Regulatory changes to the DHS state-waters Pacific cod fisheries are provided in Appendix B.

The DHS state-waters Pacific cod fishery for pot gear opens 7 days after closure of the BSAI federal/parallel Pacific cod A season for catcher vessels less than 60 feet OAL using longline and pot gear. Vessels participating in the DHS state-waters Pacific cod pot fishery are limited to a maximum of 58 feet OAL and may operate no more than 60 pots. The DHS state-waters Pacific cod fishery is an exclusive registration area for pot gear.

In 2019, the BOF set the GHL at 8% and included a step-up provision increasing the DHS state-waters Pacific cod GHL by 1% each subsequent year the GHL is achieved to a maximum of 15% of the federal Bering Sea subarea ABC. In 2023, the BOF set the GHL at 12% and altered the step-up provision to increase the GHL by 1% the subsequent year when the GHL is achieved for 2 consecutive calendar years. Additionally, new regulations included a step-down provision based on the inability to achieve the GHL for 2 consecutive calendar years to a minimum of 10% of the Bering Sea subarea ABC. From 2014 to 2024, DHS state-waters Pacific cod GHLs for pot gear ranged from 17.8 million pounds to 44.4 million pounds (Table 7). The GHL has been achieved every year. Vessel participation has ranged from 14 to 40 vessels, with the highest participation occurring in 2020 (Table 7).

The DHS state-waters Pacific cod fishery for jig gear opens May 1 with a regulatory GHL of 100,000 pounds (Table 8). Vessels participating in the DHS state-waters Pacific cod jig fishery are limited to a maximum of 58 feet OAL and may operate no more than 5 jigging machines. The DHS state-waters Pacific cod fishery is a nonexclusive registration area for jig gear.

2024 POT GEAR FISHERY

The 2024 DHS state-waters Pacific cod fishery for pot gear opened on February 1 with a GHL of 44,431,000 pounds, or 12% of the federal Bering Sea subarea ABC. The fishery closed on December 31 with a total harvest of 40,375,613 pounds. Twenty-two vessels participated in the 335-day fishery (Table 7). Harvest primarily occurred in the spring, with most of the fleet exiting the fishery by mid-April. Harvest was distributed throughout most of the registration area, with

72% coming from waters around Unimak Island. Fleetwide daily harvest ranged from 0 pounds to approximately 1.08 million pounds, with a daily average harvest of 380,000 pounds. Daily CPUE ranged from 190 to 344 pounds per pot, with a daily average CPUE of 250 pounds per pot. Fish harvesters were initially paid an average exvessel price of \$0.26 per pound for an estimated fishery exvessel value of \$10.19 million for the 2024 pot gear fishery (Table 7).

2024 JIG GEAR FISHERY

The 2024 DHS state-waters Pacific cod fishery for jig gear opened on May 1 with a GHL of 100,000 pounds (Table 8). The fishery closed on December 31; harvest is confidential because only one vessel made 2 landings during the 245-day fishery (Table 8).

GROUNDFISH HARVEST FROM PARALLEL SEASONS IN THE BERING SEA-ALEUTIAN ISLANDS AREA

Each year, by emergency order, ADF&G establishes parallel groundfish fisheries that mirror federal fisheries managed by NMFS. ADF&G generally adopts seasons, closed waters, bycatch limits, and legal gear types of the adjacent federal waters, unless superseded by state regulations.

Steller sea lion protection measures during a parallel season reflect NMFS closure areas, except in state waters between 175°W long and 178°W long during a parallel Pacific cod fishery, in which the Steller sea lion protection measures reflect those in place prior to 2011 (5 AAC 28.087(b)(3)).

Several species are harvested during the BSAI parallel fisheries; however, walleye pollock *Gadus chalcogrammus*, Pacific cod, and Pacific Ocean perch *Sebastes alutus* dominated parallel harvest by volume in 2024 (Table 9). During 2024, parallel harvest was 4.5 million pounds for walleye pollock, 3.1 million pounds for Pacific cod, and 173,000 pounds for Pacific Ocean perch (Tables 9 and 10).

Note: CF = confidential.

^a In whole fish pounds. Harvest includes all fishery removals including discards at sea and personal use.

^b Price per pound landed weight.

^c Fishery value based on landed weight.

^d Totals include black and dusky rockfish. In the early years of the fishery, dusky rockfish may have been misidentified as black rockfish; therefore, harvest totals include both species.

^e Due to reporting changes, these data are historical and cannot be replicated.

Note: GHL = guideline harvest level; CF = confidential.

^a In whole fish pounds.

^b Price per pound of landed weight.

^c Fishery value based on landed weight, in millions of dollars.

^d In days.

^e After the initial season there was about 845,000 lb of the GHL remaining. Interest from vessels warranted a small, 13-day reopening. The fishery reopened after the federal B season on 9/17/2020 and closed again on 9/29/2020.

**APPENDIX A. ALEUTIAN ISLANDS SUBDISTRICT STATE-
WATERS PACIFIC COD FISHERY MANAGEMENT PLAN
REGULATIONS BY FISHERY SEASON**

Appendix A.—Aleutian Islands Subdistrict (AIS) state-waters Pacific cod fishery management plan regulatory modifications by fishery season.

2006	<ul style="list-style-type: none"> • GHL established at 3% of federal Bering Sea-Aleutian Islands Area (BSAI) allowable biological catch (ABC) • No more than 70% of guideline harvest level (GHL) may be available before or after June 10 • Fishery opened on or after March 15, at the conclusion of the parallel catcher-vessel trawl A season • Gear types: nonpelagic trawl, longline, jig, pot, and hand troll • Adak vessel length and gear restriction zones in place (trawl and longline gear could not be used from May 1–Sep 15, unless operating in the 60 ft and under vessel size limitation zones near Adak Island) • Daily vessel harvest limit of 150,000 pounds vessel trip limit of 300,000 pounds • Mandatory Pacific cod retention, with proceeds from overage forfeited to state • Daily vessel reporting • Management plan sunset provision for Dec 31, 2007 • Closed areas: National Marine Fisheries Service (NMFS) Steller sea lion areas, Aleutian Islands Habitat Conservation Area, coral gardens • Provision for allowing unharvested state-waters Pacific cod to be utilized by NMFS
2007	<ul style="list-style-type: none"> • Vessel length limits: pot 125 ft or less, trawl 100 ft or less, longline and jig 58 ft or less • Adak vessel length and gear restriction zones repealed from state-waters fishery management plan • Vessel trip limit reduced to 150,000 pounds • Prior to June 10 defined as A season and after June 10 as B season • Season opening and closure dates: state-waters A season opens 4 days after closure of federal catcher-vessel trawl A season, closure of state-waters season during federal BSAI catcher-vessel trawl B season on April 1, and closure of state-waters season during federal BSAI catcher-vessel pot season for vessels 60 feet or greater overall length (OAL) on September 1 • Regulation allowing unharvested state-waters Pacific cod to be utilized by NMFS repealed • Management plan sunset provision repealed
2008	<ul style="list-style-type: none"> • No regulatory changes for the 2008 fishery
2009	<ul style="list-style-type: none"> • Vessel length for B season limited to less than 60 feet OAL for all gear types
2010	<ul style="list-style-type: none"> • Pot vessels less than 125 feet allowed to participate in the B season after August 1
2011	<ul style="list-style-type: none"> • No regulatory changes for the 2011 fishery
2012	<ul style="list-style-type: none"> • State-waters between 175°W long and 178°W long open January 1 and remain open until GHL is reached or June 9, whichever occurs first <ul style="list-style-type: none"> ◦ When only waters between 175°W long and 178°W long are open, vessels using nonpelagic trawl, pot, and jig gear are limited to 60 feet or less OAL and vessels using longline gear are limited to 58 feet or less OAL ◦ All state waters of the Aleutian Islands District west of 170°W long open 4 days after the parallel BSAI Pacific cod catcher-vessel trawl fishery closes, or on March 15, whichever occurs first • Steller sea lion closure for federal/parallel fishery modified <ul style="list-style-type: none"> ◦ With the exception of within 3 nmi of Kanaga Island/Ship Rock (51°46.70'N, 177°20.72'W), state-waters season continued to use those in place prior to 2011
2013	<ul style="list-style-type: none"> • No regulatory changes for the 2013 fishery

-continued-

2014	<ul style="list-style-type: none">• Clarification of rollover provisions between A and B season• Clarification of bycatch provisions• Clarification to registration requirements during concurrent state and federal Pacific cod fisheries• Update of Steller sea lion and essential fish habitat closed area references
2015	<ul style="list-style-type: none">• No regulatory changes for the 2015 fishery
2016	<ul style="list-style-type: none">• Fishery changed to just one season• GHL established at 27% of federal Aleutian Islands (AI) ABC; step-up provision of 4% for each year that the GHL is achieved up to a max of 39% of AI ABC; 15 million pound cap on GHL
2017	<ul style="list-style-type: none">• No regulatory changes for the 2017 fishery
2018	<ul style="list-style-type: none">• No regulatory changes for the 2018 fishery
2019	<ul style="list-style-type: none">• GHL established at 31% of federal AI ABC; step-up provision of 4% for each year that the GHL is achieved up to a max of 39% of AI ABC; step down provision of 4% based on inability to achieve GHL for 2 consecutive years down to a minimum of 15% of AI ABC; 15 million pound cap on GHL
2020	<ul style="list-style-type: none">• The 2019 GHL was achieved, so the 2020 GHL increased to 35% of the federal AI ABC. However, a maximum regulatory GHL is established for this fishery; therefore the 2020 GHL was 15,000,000 pounds.• Effective January 18, 2020, the AIS fishery became an exclusive registration area for all gear types.• Effective February 28, 2020, state-waters fishery opens:<ul style="list-style-type: none">○ Adak Section January 1 for longline gear no more than 58 feet OAL and no more than 60 feet for nonpelagic trawl, mechanical jig, and pot gear○ All waters of the AIS open 4 days after the BSAI parallel “A” season for the catcher-vessel greater than or equal to 60 feet OAL pot gear fishery is closed for longline gear no more than 58 feet OAL, nonpelagic trawl and mechanical jigging machines no more than 60 feet OAL, and pot gear no more than 100 feet OAL○ All waters of the AIS open 12:00 PM March 15 for nonpelagic trawl gear no more than 100 feet OAL and pot gear no more than 125 feet OAL
2021	<ul style="list-style-type: none">• The 2020 GHL was achieved, so the 2021 GHL increased to 39% of the federal AI ABC. However, a maximum regulatory GHL is established for this fishery, therefore the 2021 GHL was 15,000,000 pounds.
2022	<ul style="list-style-type: none">• The 2021 GHL was achieved, so the 2022 GHL remained at 39% of the federal AI ABC. However, a maximum regulatory GHL is established for this fishery, therefore the 2022 GHL was 15,000,000 pounds
2023	<ul style="list-style-type: none">• Effective March 26, 2023, the state-waters season dates are as follows:<ul style="list-style-type: none">○ Adak section January 1 for longline gear no more than 58 feet OAL, nonpelagic trawl gear and mechanical jigging machines no more than 60 feet OAL, and pot gear no more than 100 feet OAL○ All waters of the AIS open February 1 at noon Alaska time or 4 days after the BSAI parallel “A” season for the catcher-vessel greater than or equal to 60 feet OAL pot gear fishery closes, whichever occurs first, for nonpelagic trawl gear and mechanical jigging gear no more than 60 feet OAL, pot gear no more than 100 feet OAL, and longline gear no more than 58 feet OAL.

-continued-

2023 (continued)

- Effective March 26, 2023, the fishing season for vessels over 60 feet OAL using pot gear shall close when 25% of the GHL has been taken by those vessels or on December 31, whichever occurs first, unless rescinded by EO any time after March 15.
 - If at any time after March 15, it is determined the GHL will not be achieved by December 31, the commissioner may close the fishing season by emergency order and immediately reopen a state-waters season during which the following may be implemented to increase the harvest rate in an attempt to reach the GHL: remove the 150,000 round pound daily harvest level, designate the fishery as a nonexclusive registration area, remove the 25 percent harvest limit for pot gear vessels greater than 60 feet OAL, allow for nonpelagic trawl vessels up to 100 feet OAL to participate, allow for pot gear vessels up to 125 feet OAL to participate.
 - 2022 GHL was not achieved; this was the first season it was not achieved so the GHL remained at 39% of the federal AI ABC for the 2023 season.
-

2024

- The GHL was not achieved for two consecutive years, so the GHL was reduced to 35% of the federal AI ABC for the 2024 season.
-

Note: Regulatory changes are shown according to the first season they went into effect.

**APPENDIX B. DUTCH HARBOR SUBDISTRICT STATE-
WATERS PACIFIC COD FISHERY MANAGEMENT PLAN
REGULATIONS BY FISHERY SEASON**

Appendix B.–Dutch Harbor Subdistrict state-waters Pacific cod fishery management plan regulatory modifications by fishery season.

2014	<ul style="list-style-type: none"> • GHL established at 3% of federal Bering Sea-Aleutian Islands Area (BSAI) allowable biological catch (ABC) • Fishery opens at 12:00 PM 7 days following the closure of the federal BSAI hook-and-line/pot catcher vessel less than 60 feet in overall length sector • Gear types: pots; no more than 60 pots may be operated from a vessel • Vessel may not be longer than 58 feet in overall length • Mandatory Pacific cod retention • Daily vessel reporting • Closed areas: National Marine Fisheries Service (NMFS) Steller sea lion areas, Aleutian Islands Habitat Conservation Area, coral gardens
2015	<ul style="list-style-type: none"> • No regulatory changes for the 2015 fishery
2016	<ul style="list-style-type: none"> • NMFS separated the BSAI Pacific cod ABC into 2 areas starting in 2014. The state-waters guideline harvest level (GHL) increased from 3% to 6.4% and was only deducted from the federal Bering Sea (BS) ABC • Expanded western fishing boundary to 170°W long
2017	<ul style="list-style-type: none"> • No regulatory changes for the 2017 fishery
2018	<ul style="list-style-type: none"> • No regulatory changes for the 2018 fishery
2019	<ul style="list-style-type: none"> • Expanded eastern boundary to 162°30'W long • GHL increased to 8% of the federal BS ABC; step-up provision of 1% each year when the GHL is achieved to a max of 15% of BS ABC • Established nonexclusive fishery for mechanical jigging gear; GHL of 100,000 pounds; fishery opens May 1; no more than 5 jigging machines may be operated from a vessel
2020	<ul style="list-style-type: none"> • 2019 GHL for pot gear was achieved, 2020 GHL for pot gear increased to 9% of the federal BS ABC
2021	<ul style="list-style-type: none"> • 2020 GHL for pot gear was achieved, 2021 GHL for pot gear increased to 10% of the federal BS ABC
2022	<ul style="list-style-type: none"> • 2021 GHL for pot gear was achieved, 2022 GHL for pot gear increased to 11% of the federal BS ABC
2023	<ul style="list-style-type: none"> • 2022 GHL for pot gear was achieved, so the GHL increased to 12% of the federal BS ABC for the 2023 season • Effective March 26, 2023, the DHS GHL for pot gear will be 12% of the federal BS ABC; step up provision based on achievement of GHL for two consecutive calendar years to max 15% of the BS ABC; step down provision based on inability to achieve GHL for two consecutive calendar years to a minimum of 10% of the BS ABC. 2023 GHL for pot gear was achieved.
2024	<ul style="list-style-type: none"> • No regulatory changes for the 2024 fishery

Note: Regulatory changes are shown according to the first fishery season they went into effect.
