REGIONAL INFORMATION REPORT NO. 1J10-16

2010-2011 WINTER TROLL FISHERY MANAGEMENT PLAN

by

Pattie Skannes, and Grant Hagerman Alaska Department of Fish and Game, Division of Commercial Fisheries, Sitka

> Alaska Department of Fish and Game Division of Commercial Fisheries, Publications Section 802 3rd, Douglas, Alaska, 99824-0020

> > September, 2010

The Regional Information Report Series was established in 1987 and was redefined in 2007 to meet the Division of Commercial Fisheries regional need for publishing and archiving information such as project operational plans, area management plans, budgetary information, staff comments and opinions to Board of Fisheries proposals, interim or preliminary data and grant agency reports, special meeting or minor workshop results and other regional information not generally reported elsewhere. Reports in this series may contain raw data and preliminary results. Reports in this series receive varying degrees of regional, biometric and editorial review; information in this series may be subsequently finalized and published in a different department reporting series or in the formal literature. Please contact the author or the Division of Commercial Fisheries if in doubt of the level of review or preliminary nature of the data reported. Regional Information Reports are available through the Alaska State Library and on the Internet at: http://www.sf.adfg.ak.us/statewide/divreprots/htlm/intersearch.cfm.

ABSTRACT

This report summarizes the plan that the Alaska Department of Fish and Game will follow to manage the 2010–2011 Southeast Alaska winter commercial troll Chinook salmon fishery, according to the Board of Fisheries regulations in the State of Alaska Administrative Code under 5 AAC 29.080.

Key words: Chinook salmon, troll, winter, commercial, management plan, Alaska

INTRODUCTION

This plan summarizes the management approach the Alaska Department of Fish and Game (department) will employ to manage the Southeast Alaska/Yakutat commercial salmon winter troll fishery during the 2010–2011 season, provides harvest data from the previous winter troll season, and provides information about how regulations will be applied.

Regulations pertaining to the troll fishery are available in the 2009–2012 Southeast Alaska and Yakutat Commercial Salmon Fishing Regulations pamphlet available at all Southeast Alaska ADF&G area offices.

MANAGEMENT PLAN

The winter Chinook salmon troll fishery in Southeast Alaska is managed in accordance with the Alaska Board of Fisheries (BOF) winter troll management plan [5 AAC 29.080] and the Pacific Salmon Treaty (PST). The 2010–2011 Southeast and Yakutat commercial winter troll season begins October 11, 2010 and will continue through April 30, 2011, or until a total of 45,000 Chinook salmon are harvested [5 AAC 29.070 (b)(1) and 5 AAC 29.080 (a)]. Treaty Chinook salmon caught in the winter troll fishery count towards the 2011 Southeast Alaska troll fishery allocation and the 2011 Southeast Alaska all-gear Treaty quota. There is currently no quota yet established for the overall 2011 season; however, the winter troll fishery will be managed so the total harvest of all Chinook salmon does not exceed 45,000 fish, with a guideline harvest range of 43,000 to 47,000 fish [5 AAC 29.080 (a)]. Any Treaty Chinook salmon not harvested during the winter fishery will be available for harvest in the spring and summer fisheries. The 45,000 fish cap was reached prior to April 30 during the 2003–2007 winter seasons. Prior to 2003, the cap had not been exceeded since it went into effect in 1995. In 2010 the winter season closed on April 30 by regulation because only 95% of the cap had been harvested prior to that date.

2009–2010 WINTER TROLL HARVEST

The 2009–2010 winter troll Chinook harvest was 42,536 fish, with a 12.6% Alaska hatchery contribution. This compares to a harvest of 24,889 fish with an Alaska hatchery contribution of 11.1% in 2008–2009, and a 2005 to 2009 average harvest of 38,594 fish. A total of 459 permits were fished in 2009–2010. This compares to 429 in 2008–2009 and a 2005 to 2009 average of 462 permits fished. Harvest and effort in 2010 were highest in March and April (Tables 1–7).

REGULATION SUMMARY

Regulations pertaining to the Southeast Alaska winter trolling season are compiled in the 2009–2012 Southeast Alaska and Yakutat Commercial Salmon Fishing Regulations pamphlet. The following list is a guide to the pertinent winter regulatory subsections. These regulations may be modified inseason by emergency order; any such changes will be announced via standard Commercial Fisheries Division News Releases. Copies of news releases, emergency orders, and regulation books are available at all Southeast Alaska Fish and Game area offices.

FISHING AREAS AND TIMES

The winter troll fishery is confined to the area east of a line that extends from the westernmost tip of Point Manby through 59°41.66' N. lat., 140°19.70' W. long., to 59°40.02' N. lat., 140°24.36' W. long. to 59°31.25 N. lat., 139°53.69' W. long. to 59°32.06' N. lat, 139°51.46' W. long. and then continues along the surf line as described in [5 AAC 29.020 (b)] (Figures 1, 2, and 3). Trolling is also allowed within 500 yards of the terminus of any salmon stream during the winter season except as listed under 5 AAC 29.080(b) [5 AAC 29.150 (a)(1)]. Salmon fishing districts of Southeast Alaska and Yakutat are shown in Figure 4. Winter troll closed waters are described in the following section of this plan.

CLOSED WATERS

Salmon trolling is permitted in all previously mentioned areas and at all times during the winter season, except as indicated below, according to 5 AAC 29.080 (b):

- 1. **District 1**: waters of Behm Canal in Section 1-D between a line from Nose Point to Snail Point and a line from Cactus Point to Point Eva are closed.
- 2. **District 8**: waters of the Stikine River inside a line from Babbler Point to Hour Point, along the shore of Wrangell Island to Point Highfield to the southernmost tip of Liesnoi Island to the southernmost tip of Greys Island to the small island near the eastern entrance of Blind Slough, to the nearest point of Mitkof Island, to the prominent point of Mitkof Island nearest Coney Island, to the northernmost tip of Coney Island, to a point 500 yards north of Jap Creek on the mainland shore are closed.

3. **District 11**:

- A. <u>Section 11-A is closed except</u> those waters west of a line from Outer Point to Point Louisa and south and east of a line from Salisbury Point to Point Tantallon. This area will close at 11:59 p.m., April 14, regardless of whether the winter troll season is open after that date. The <u>waters of Gastineau Channel are closed</u>.
- B. <u>Section 11-B is open</u> throughout the winter season <u>except</u> those waters north of the latitude of Grave Point Light are open only from October 11 through March 31.
- 4. **District 15**: waters of Section 15-B (Berners Bay) are closed.

Except for those areas specified in this section, all remaining waters listed in the "Closed Waters" section of the regulation book are open to trolling during the winter troll season.

GEAR, VESSEL SPECIFICATIONS AND REGISTRATION

- 1. Troll vessels must be registered prior to fishing for the calendar year (5 AAC 29.115).
- 2. Troll vessels must be identified as specified in (5 AAC 39.119) and (5 AAC 29.125).
- 3. For troll gear specifications and operations see (5 AAC 29.120).

During the <u>winter fishery only</u>, hand-operated downriggers <u>may</u> be used in conjunction with fishing rods as follows (5 AAC 29.120(j)):

- 1. A downrigger may not be used with a troll gurdy;
- 2. A hand troll gurdy or downrigger powered by hand or hand crank <u>may be used</u> in conjunction with a fishing rod, and is not considered power troll gear;

- 3. An electric, hydraulic, or power assisted downrigger is considered a power troll gurdy and may not be used in conjunction with a fishing rod;
- 4. An aggregate of **two rods** with the fishing lines extending from the rods and connected to **two downriggers or hand troll gurdies** using a quick release device designed to release the fishing rod line from the downrigger line <u>may be used</u>;
- 5. No more than two troll gurdies, and four rigged fishing rods capable of taking fish, may be on board a salmon hand troll vessel; additional fishing rods may be on board the vessel but may not be rigged for taking fish.

SIZE AND LANDING REQUIREMENTS

Chinook salmon caught in the winter troll fishery must be equal to or greater than 28 inches in total length and the heads of all adipose-fin clipped salmon must remain attached until the fish is sold. For further specifications see (5 AAC 29.140).

SPORT FISHING AND CHARTERING FROM A REGISTERED TROLL VESSEL

- 1. A person may sport fish from a registered commercial salmon hand troll or power troll vessel [5 AAC 47.041 (a)]. A person who sport fishes from a vessel licensed for commercial fishing, other than a charter vessel, **in waters closed** to commercial salmon fishing shall, immediately upon bringing a salmon onboard, mark the salmon by **removing its dorsal fin** [5 AAC 47.041 (c)]. This regulation also applies when a person is sport fishing for a **species closed** to commercial trolling. Sport fishing from a commercially licensed vessel while commercially caught salmon are in possession is illegal in waters closed to commercial fishing [5 AAC 47.041(d)]. A troll gurdy may be used as a downrigger in conjunction with a sport fishing rod to sport fish for salmon.
- 2. A registered troll vessel may also be registered as a charter vessel. Charter boat registration applications are available at Fish and Game offices. A vessel registered both as a commercial troller and as a charter vessel may not be used to troll commercially and charter in the same day [5 AAC 75.995(8)].

REGULATIONS PERTAINING TO COMMERCIAL TROLL BYCATCH OF GROUNDFISH AND HALIBUT

For information on Southeast Alaska Groundfish regulations, refer to the 2010–2011 Statewide Commercial Groundfish Fishing Regulations booklet available at all Southeast ADF&G area offices. Information on groundfish bycatch allowances in the troll fishery can be found in the "Groundfish Bycatch in the 2010 Salmon Troll Fishery" news release that was issued on December 18, 2009.

In the state waters portion of the Eastern Gulf of Alaska, all groundfish incidentally taken by hand and power troll gear operated to take salmon consistent with applicable laws and regulations are legally taken and possessed with the following restrictions:

- The bycatch allowance for demersal shelf rockfish (DSR) is limited to 10% of the round weight of all salmon on board the vessel. All DSR in excess of 10% must be weighed and reported as bycatch overage on an ADF&G fish ticket. All proceeds from the sale of excess DSR bycatch taken in state waters shall be surrendered to the state [5 AAC 28.171 (a)]. The seven species of rockfish in the DSR assemblage are yelloweye, quillback, canary, rosethorn, copper, china, and tiger rockfish. DSR bycatch overages must be reported on fish tickets but may be kept for a person's own use.
- The bycatch allowance for spiny dogfish in state waters is limited to 35% of the round weight of salmon on board the vessel.

- Lingcod may be taken as bycatch in the commercial salmon troll fishery only from May 16 through November 30 [5AAC 28.113 (c)].
- Lingcod must measure at least 27 inches from the tip of the snout to the tip of the tail, or 20.5 inches from the front of the dorsal fin to the tip of the tail.
- The 2010 commercial troll lingcod allocation has been harvested in the Icy Bay Subdistrict (IBS) and the Northern Southeast Outside (NSEO) Section and these areas are closed to lingcod retention for the remainder of the season. Lingcod allocation remains available for the fall portion of the winter troll fishery in the Central Southeast Outside (CSEO) Section, Southern Southeast Outer Coast (SSEOC) Sector, Northern Southeast Inside (NSEI) Subdistrict, and the Southern Southeast Internal Waters (SSEIW) Sector. Lingcod bycatch may be retained in these areas in unlimited amounts until area allocations are taken or November 30, whichever occurs first.
- The retention of lingcod is prohibited in the troll fishery in the waters of Sitka Sound [5AAC 28.150(a)]. The Sitka Sound closure area is defined as the waters that are enclosed on the north by lines from Kruzof Island at 57°20.50' N. lat., 135°45.17' W. long. to Chichagof Island at 57°22.05' N. lat., 135°43.00' W. long., and from Chichagof Island at 57°22.58' N. lat., 135°41.30' W. long. to Baranof Island at 57°22.28' N. lat., 135°40.95' W. long., and on the south and west by a line running from the southernmost tip of Sitka Point at 56°59.38' N. lat., 135°49.57' W. long. to Hanus Point at 56°51.92' N. lat., 135°30.50' W. long. to the green day marker in Dorothy Narrows at 56°49.28' N. lat., 135°22.75' W. long. to Baranof Island at 56°49.28' N. lat., 135°22.60' W. long.

Lingcod harvest allocations for the troll fishery are set by Lingcod Management Area (Figure 5) and area closures will occur as allocations are taken. Inseason closures will be announced by news release and marine radio broadcast by the United States Coast Guard and National Weather Service. For updates on lingcod area closures, call the Groundfish Hotline at 747-4882 or contact the Groundfish staff in Sitka at 747-6688.

Other regulations:

Halibut incidentally taken during an open commercial halibut season by power and hand troll gear being operated for salmon consistent with applicable state laws and regulations are legally taken and possessed [5AAC 28.133 (c)]. Commercial halibut may be legally retained only by IFQ permit holders during the open season for halibut. Trollers making an IFQ halibut landing of 500 lbs or less of IFQ weight as determined pursuant to 50 CFR 679.42(h) are exempted from the 3 hour Prior Notice of Landing (PNOL) if landed concurrently with a legal landing of salmon [50 CFR 679.5(l)(1)(iv)(A)]. Halibut taken incidentally during the troll fishery shall be reported on an ADF&G fish ticket using the CFEC salmon permit. For information on regulations and landing requirements for the federal IFQ halibut fishery contact the National Marine Fisheries Service.

Trollers are allowed to longline for groundfish and troll for salmon on the same trip as long as fish are not onboard the vessel in an area closed to commercial fishing or closed to retention of that species and the fisher has both a commercial salmon permit and the appropriate commercial longline permit.

A vessel may not participate in a directed fishery for groundfish with dinglebar troll or mechanical jig gear if they have commercial caught salmon on board. A vessel fishing for

groundfish with dinglebar troll gear must display the letter "D" and a vessel fishing for groundfish with mechanical jigging machines must display the letter "M" at all times when fishing with or transporting fish taken with dinglebar troll gear or mechanical jigging machines [5AAC 28.135 (a)(4)]. A person may not operate a vessel that is displaying one of these letters when the vessel is being used to fish for salmon [5AAC 28.135 (c)].

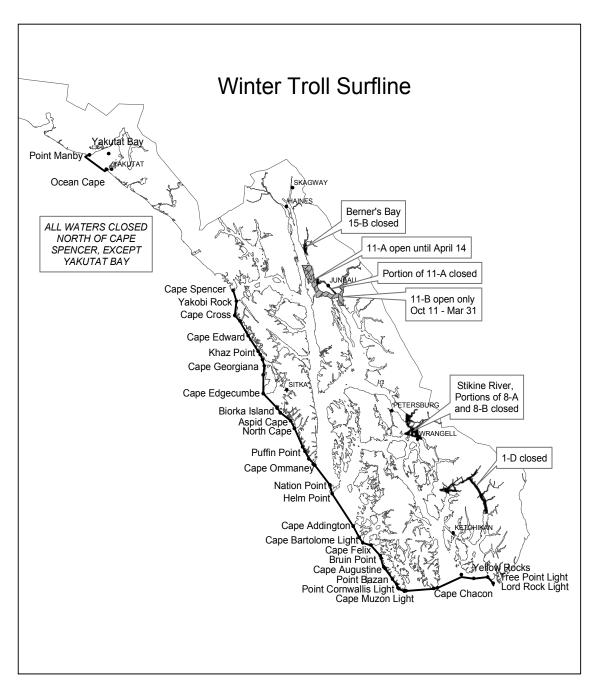

Figure 1.—Southeast Alaska/Yakutat winter troll fishery areas.

Note: For a full description of areas closed to winter trolling, see page 4 of this guide.

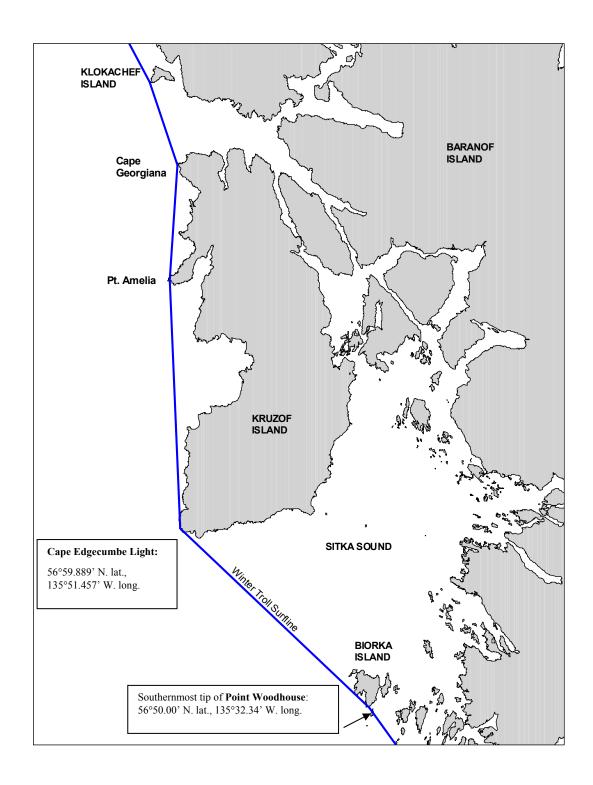

Figure 2.—Sitka area winter troll boundary line (surfline).

Note: The Cape Edgecumbe Light coordinates are from the United States Coast Guard Light List, Vol. VI, 2010.

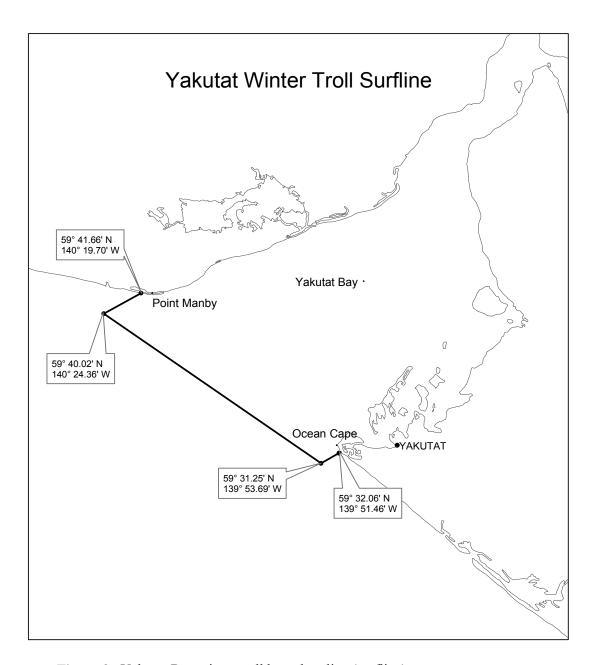

Figure 3.—Yakutat Bay winter troll boundary line (surfline).

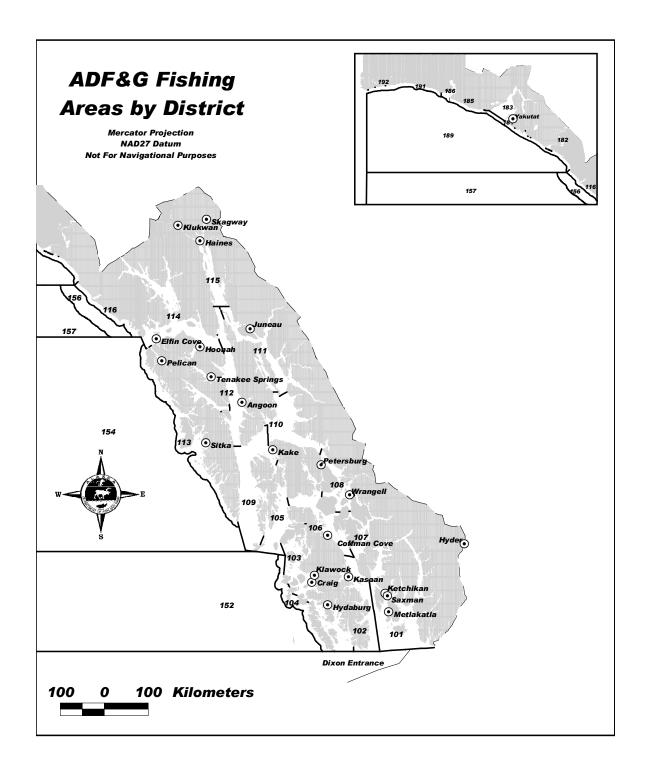

Figure 4.—Southeast Alaska/Yakutat salmon fishing districts.

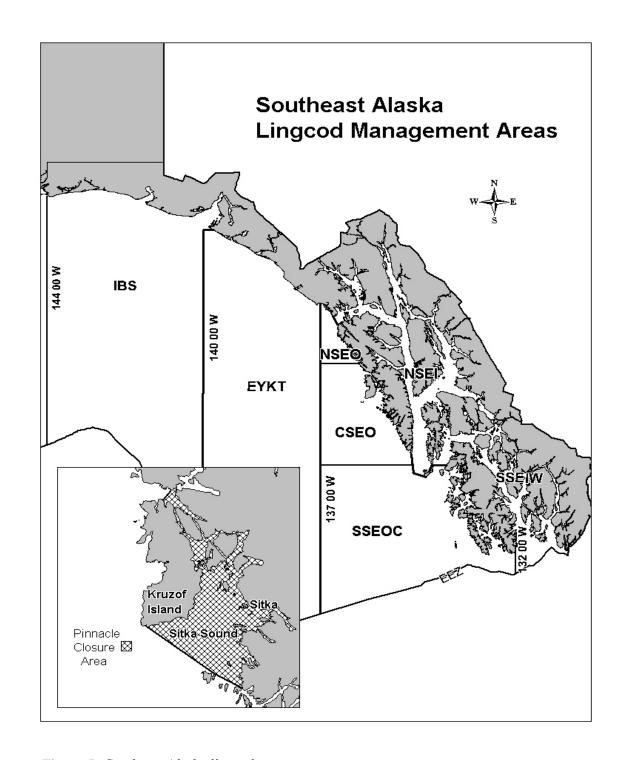

Figure 5.—Southeast Alaska lingcod management areas.

Note: All areas will close to lingcod retention on November 30, unless closed earlier by emergency order. See pages 5-7 of this guide for further regulations pertaining to groundfish retention.

ACKNOWLEDGEMENTS

This report was compiled and written by the Southeast Alaska troll management staff, which includes Pattie Skannes (Regional Troll Management Biologist) and Grant Hagerman (Assistant Troll Management Biologist). MikeVaughn (Groundfish Biologist) assisted with the groundfish regulation section of this report. Bill Davidson (Regional Management Biologist) edited the final document.
