FORM 02 001B

MEMORANDUM

State of Alaska
DEPARTMENT OF FISH & GAME

TO: George Hollett
Division of Lands
Department of Natural Resources
Fairbanks

DATE : January 3, 1974

FROM: Don Bill
Regional Access Biologist
Habitat Section
Fairbanks

SUBJECT: Rainbow Lake

The Department of Fish and Game requests a Reserved Use Classification on 240 acres surrounding Rainbow Lake. The description of the area is the E 1/2 SE 1/4, Section 14, T9S, R8E, F.M. and the SW 1/4, Section 13, T9S, R8E, F.M.

Rainbow Lake is managed by the Sport Fish Division of our Department and was stocked with 59,100 rainbow trout in 1971. It presently contains fish over 20 inches in length. Angling pressure is light to moderate. There is no road or trail to the lake, however there are plans to cut and mark a winter snowmachine trail.

The Alaskan Interior has a limited number of lakes suitable for fishery management which are close enough to population centers to provide good angling. This area provides a pristine environment where the public may enjoy outdoor activities.

Your aid in assuring public sport fishing access is appreciated. Attached are necessary applications and maps. If further information is needed, please feel free to contact this office.
