Rapids Lake

~~Rapids~~ This small 5 acre lake is located in mountainous terrain near Mile 226 of the Richardson Highway. Formed by the ~~blocken~~ natural blocking of a narrow canyon ~~by~~ by rock and gravel deposits from Falls Creek, the lake has a maximum depth of 23 feet. ~~The~~ Rock walls rising from the waters edge border most of the shoreline. ~~A~~ A dense growth of alder, willow and birch surround the lake.

A water fall on Falls Creek forms a barrier to fish which might enter from the ~~mo~~ Delta River.

A foot trail east of the highway from the Black Rapids Glacier ~~p~~ scenic viewpoint, leads to the lake.

The lake has been stocked with rainbow trout regularly since 1962. The largest fish netted was 17 inches in a 1966. ~~[redacted]~~ A sample of 16 rainbow trout averaged 10.4 inches.

The fishery is utilized primarily by tourists and military personnel from the nearby Black Rapids mountain training site.
