### Gv

Event 1 - Marked 1 Gv (12 Trap n)
Event 2 - Examined 3 Gv; 0 recap. (21 Trap N.)

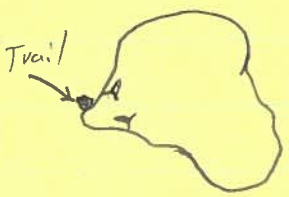

1 Gv @ 99 mm = natural reproduction
Some big Gv present, based on fishing during event 1, but much of the surface feeding is apparently LT.

Description of Trap Locations - Meadows Rd.
As of, 8/16/90.

---

Bullwinkle Lake -

2 Traps -
1 at Landing, 1 around to RT

---

Sheefish Lake -

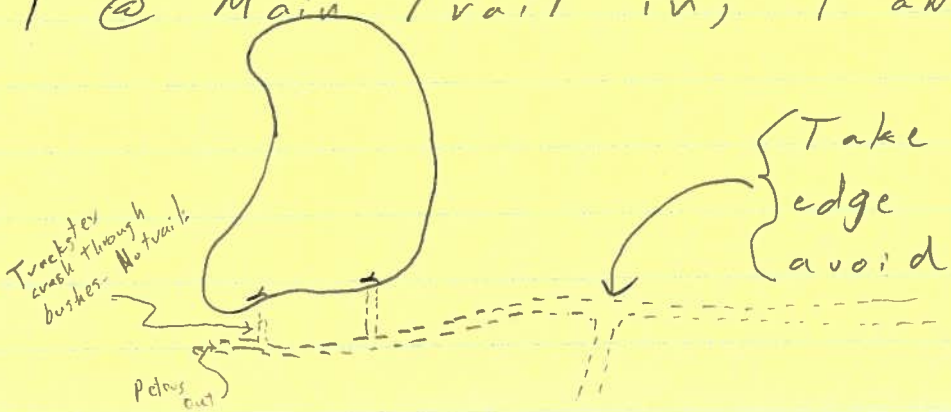

3 Traps -
1 @ Trail in, 1 to Rt, 1 to Left

---

Ghost Lake -

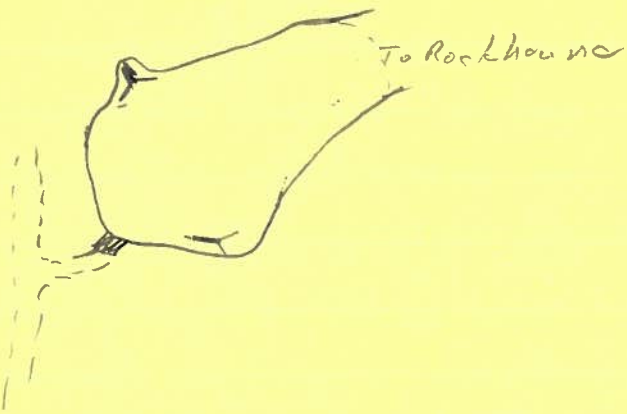

2 Traps -
1 @ Main Trail in, 1 about 300' Left.

## Trap Locations, Meadows Rd, cont.

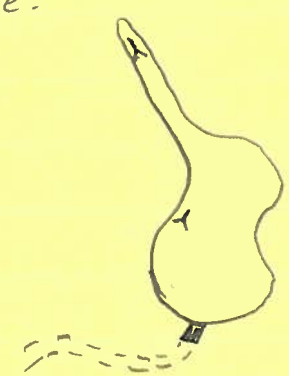

### No Mercy Lake -

2 Traps -
1 To right of landing 125 - 175'
1 To left in channel up in N end of lake

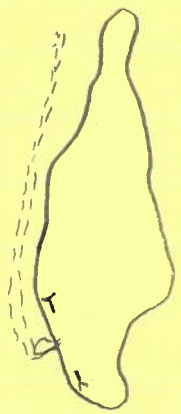

### Doc Lake -

2 Traps -
Both to left of landing
1 halfway up to end of lake
1 way up in end of channel @ end of lake.

## Nickel Lake -

2 Traps
1 to left of landing
1 to right of landing

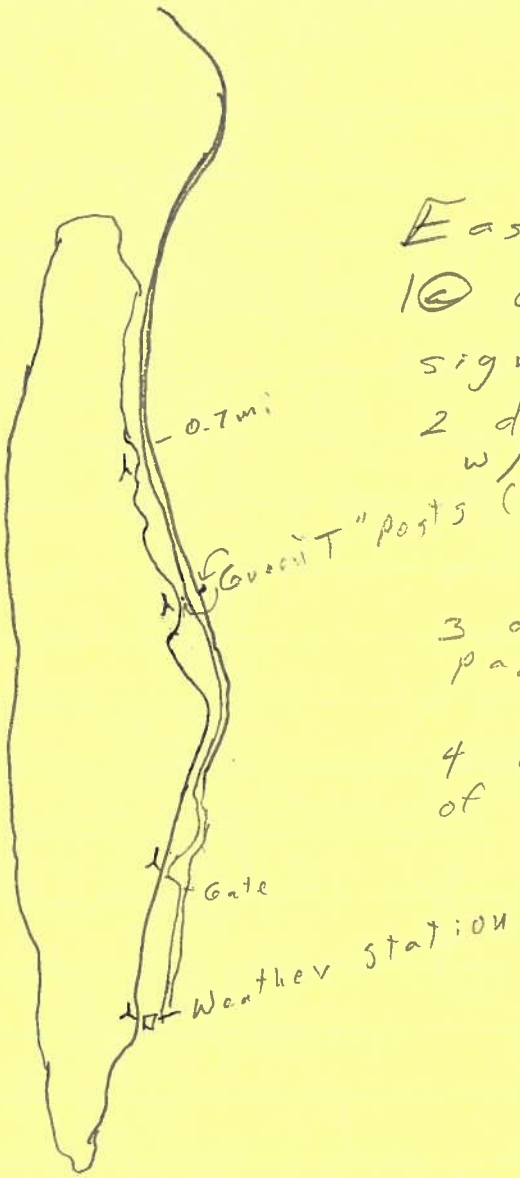

## Chet Lake -

2 Traps
1 to Rt of landing
1 across lake from landing on Eastern Shore.

## Bolio Lake – 4 Traps

Eastern shoreline @ 0.7mi from yield sign.

2 directly in line w/ Green "T" posts (may be 2 sets of green T posts.

3 off N end of pad by gate

4 out a to rt (N) of weather station.

I would reccommend driving by and checking road accessible traps – Bolio, Chet, & Nickel – then if all standing start wherever – if not standing put them up again overnight a start w/ trackster work (Ghost).
