[a] Fish were caught using fyke (Fyke) nets or variable mesh (VM) gillnets. CPUE = (number sampled / hrs. set x 60).
[b] Note: In 2009, ADF&G began sampling only fish >200mm in length and weight; in prior years fish 100mm or greater were sampled. Weight is in pounds and ounces; 1 lb 15.4 ozs = 1.15.4. To maintain consistency, the CPUE still includes all fish 100mm or greater.

COMMENTS: Aurora Lake was stocked annually with 800 rainbow trout fingerling until 2012. Stocking was discontinued in 2013-2007 due to minimal effort. The last year coho salmon were stocked was in 2002. Rainbow trout fingerling were stocked in 2003 in place of coho salmon due to changes in the statewide stocking plan. Aurora Lake stocking was reinstated in 2018 with 500 rainbow trout fingerling slated to be stocked annually from 2023-2027.
