JUSTIFICATION:

The sport fishery for hatchery produced king salmon in terminal waters of Wrangell Narrows and fresh waters of Blind Slough is managed under the Wrangell Narrows-Blind Slough Terminal Harvest Area Management Plan (5 AAC 33.381) and the Southeast King Salmon Management Plan (5 AAC 47.055). The Wrangell Narrows-Blind Slough Terminal Harvest Area Management Plan (5 AAC 33.381) distributes harvest of the Crystal Lake Hatchery king salmon run among sport and commercial troll fisheries while preserving a portion of the run for hatchery brood stock. When the projected king salmon run to the terminal harvest area is greater than 4,000 fish, the Wrangell Narrow-Blind Slough Terminal Harvest Area Management Plan (5 AAC 33.381) instructs the department to increase the daily bag limit to more than two king salmon 28 inches or greater in length, and more than two king salmon less than 28 inches in length from June 1 through July 31. In 2006, the projected Crystal Lake Hatchery king salmon run is expected to exceed 5,200 fish. Therefore, the department is increasing the king salmon bag and possession limits to three king salmon 28 inches or greater in length, and three king salmon less than 28 inches in length within the boundaries of the Wrangell Narrows-Blind Slough Terminal Harvest Area.

The Southeast King Salmon Management Plan (5 AAC 47.055) authorizes the department to repeal the nonresident angler annual limit provisions in hatchery terminal harvest areas.
