5 AAC 64.022 Waters; seasons; bag, possession, and size limits; and special provisions for the Kodiak area.

(b)(9) in the Karluk River drainage from June 1 through July 25, king salmon may not be retained or possessed. King salmon caught may not be removed from the water and must be released immediately. With the exception of Karluk Lake, only one unbaited single-hook or single-hook lure may be used in the Karluk River drainage.

Cora Campbell,
Commissioner

By delegation to:

Donn Tracy,
Kodiak Area Management Biologist

JUSTIFICATION:

The biological escapement goal (BEG) for Karluk River king salmon is 3,000 to 6,000 fish and has been achieved only twice since 2006. In January 2011 the Board of Fish designated Karluk River king salmon a stock of concern. Recent poor productivity warrants non-retention of all king salmon, regardless of size. Additionally, to reduce mortality, the use of bait and multiple hooks is prohibited within Karluk drainage below Karluk Lake. Harvest opportunity may be allowed by subsequent emergency order if inseason assessment of the Karluk River king salmon run indicates the BEG will be attained.
