JUSTIFICATION:

In 2000, the Alaska Board of Fisheries (board) modified sport fishing regulations for lingcod in Southeast Alaska in response to widespread decline in abundance as indicated in the directed lingcod commercial fishery. The board established a guideline harvest level (GHL) approach for sport and commercial fisheries management of lingcod in Southeast Alaska (5 AAC 28.160 (e)). The GHL was allocated between sport and commercial users by the board for seven fishery management areas (5 AAC 28.165). The board also expanded the department's authority to modify regulations to achieve the lingcod allocation for the sport fishery (5 AAC 47.060).

Since 2000, the department has implemented regulations annually, by emergency order, including minimum length and slot limits, reduced bag and possession limits, annual limits, non-retention of fish by charter operators and crew members, and reduced seasons. These regulations have been effective at

maintaining the sport fishery lingcod harvest near or below allocations in all of the management areas. Sport fishing provisions established by this emergency order for the Northern and Southern Southeast areas are identical to lingcod regulations implemented by emergency order during 2016. The 2016 Yakutat Area lingcod slot size limit of 30 inch minimum to 45 inches in length has been increased to 35 inch minimum to 50 inches in length for the 2017 by this emergency order to meet the sport allocation. These actions are being taken under the authority granted to the department by the board within the lingcod delegation of authority and provisions for management (5 AAC 47.060).

This action is necessary to ensure that sport harvests of lingcod stay within the regulatory harvest allocations to the sport fishery.
