JUSTIFICATION:

The Copper River Subsistence Salmon Fisheries Management Plan provides the opportunity to subsistence fish for sockeye salmon in the Batzulnetas area. The plan directs the department to establish fishing periods by emergency order, and specifically states that periods are for 48 hours per week during June and 84 hours per week after June 30 through September 1, or until closed by emergency order. The Copper River preseason forecast projects a sockeye salmon run sufficient to provide for Copper River escapement needs, subsistence and other nonsubsistence harvests.
