JUSTIFICATION:

The 2019 preseason outlook for the Unalakleet River drainage king salmon run is expected to be insufficient to provide for a moderate harvestable surplus. According to the *Subdistricts 5 and 6 of the Norton Sound District and the Unalakleet River King Salmon Management Plan*, when the inriver subsistence fishery is closed to the retention of king salmon, sport fishing for king salmon will be closed. At this time, restrictions are planned to close the inriver Unalakleet River subsistence fishery for king salmon effective June 16, 2019.

The department does not have reliable inseason stock assessment information for the Shaktoolik, Koyuk, Ungalik, Inglutalik, and Golsovia river drainages, but these king salmon runs generally trend with Unalakleet River stocks. The closure of sport fishing for king salmon in these rivers will provide protection for returning fish. The prohibition of bait while sport fishing is in accordance with provisions set forth in 5 AAC 75.003 (1)(A). This action should minimize catch-and-release mortality for king salmon incidentally caught while sport fishing for other species.

The department will continue to evaluate inseason run strength and take appropriate management actions to ensure that escapement requirements are met. If inseason stock assessment information indicates that the king salmon escapement objectives in the Unalakleet River will be met, restrictions will be relaxed.
