JUSTIFICATION: The *Redoubt Bay and Lake Sockeye Salmon Management Plan* (5 AAC 01.760) provides management provisions for sport, subsistence, and commercial fisheries that harvest Redoubt Lake sockeye salmon based on an optimal escapement goal of 7,000 to 25,000 fish. The plan directs the department to increase the sockeye salmon sport fish bag and possession limit from four to six fish if the projected total escapement is greater than 30,000 sockeye salmon. As of July 19, 9,900 sockeye salmon had passed the Redoubt Lake weir. Based on previous years run timing, the 2020 escapement is projected to exceed 30,000 sockeye salmon. Therefore, the department is establishing a bag and possession limit of six sockeye salmon in Redoubt Bay and in the Redoubt Lake drainage, as directed under the management plan.
