

SPORT FISHING

Emergency Order

ALASKA DEPARTMENT
OF FISH & GAME

Under Authority of AS 16.05.060

Emergency Order No. 2-KS-1-23-22

Issued at: Soldotna, Monday, June 6, 2022

Effective Date: 12:01 a.m. Wednesday, June 8, 2022

Expiration Date: 11:59 p.m. Thursday, June 30, 2022, unless superseded by subsequent emergency order.

EXPLANATION:

This emergency order supersedes Emergency Order 2-KS-1-07-22, issued January 26, 2022. The retention of naturally-produced king salmon is prohibited, and sport fishing gear is limited to one unbaited, single-hook, artificial lure while sport fishing in the Kasilof River. Naturally-produced king salmon have an adipose fin and may not be removed from the water and must be release immediately.

REGULATION:

The provisions of 5 AAC 56.122. (8)(A)(i) and (ii) and (8)(B)(ii) are superseded by this emergency order. Under this emergency order, the following provisions are effective 12:01 a.m. Wednesday, June 8 through 11:59 p.m. Thursday, June 30, 2022.

5 AAC 56.122. Special provisions for the seasons, bag, possession, annual, and size limits, and methods and means for the Kenai Peninsula Area.

- (8) Kasilof River drainage, excluding Crooked Creek and Tustumena Lake and its tributaries:
- (A) king salmon may be taken from January 1 – June 30, upstream of the Sterling Highway Bridge, and from January 1 – July 31, downstream of the Sterling Highway Bridge; bag and possession limit for king salmon 20 inches or greater in length of one fish; annual limit of five king salmon 20 inches or greater in length; a harvest record is required as specified in 5 AAC 75.006; from June 8 – June 30
 - (i) the bag and possession limit for king salmon 20 inches or greater in length is two hatchery fish; a king salmon 20 inches or greater in length that is removed from the water must be retained and become part of the bag limit of the person originally hooking it; a person may not remove a king salmon from the water before releasing the fish;
 - (ii) naturally-produced king salmon of any size may not be retained; a person may not remove a naturally-produced king salmon from the water before releasing the fish;
 - (B) the following special provisions apply in that portion downstream of the Sterling Highway Bridge:
 - (ii) in flowing waters, from June 8 – June 30, only one unbaited, single-hook, artificial lure may be used;

By delegation to:

Doug Vincent-Lang
Commissioner

Colton G. Lipka
Area Management Biologist

JUSTIFICATION:

As provided by 5 AAC 57.160. *Kenai River and Kasilof River Early-Run King Salmon Management Plan* (c), the ADF&G shall manage the Kasilof River early-run king salmon sport and guided sport fisheries to achieve the sustainable escapement goal (SEG), to provide reasonable harvest opportunities over the entire run while ensuring adequate escapement of naturally-produced king salmon, and to minimize the effects of conservation actions for the Kenai River on the Kasilof River.

ADF&G has issued an emergency order to close the Kenai River early-run king salmon sport fishery. This will likely result in an increase in the sport fishing effort and catch of naturally-produced king salmon in the Kasilof River. ADF&G manages the Kasilof River king salmon sport fishery to achieve a sustainable escapement goal of 700 – 1,400 naturally-produced king salmon as monitored through a weir at an ADF&G facility located on Crooked Creek. From 2019 – 2020, restrictions were necessary to ensure the SEG for naturally-produced king salmon and the broodstock goal for increased hatchery stocking were achieved. In 2021, restrictions were implemented yet the escapement goal and broodstock goal were not achieved.

Production of hatchery-produced king salmon to enhance the Kasilof River early-run king salmon fishery originates from naturally-produced king salmon that are surplus to Crooked Creek escapement needs. In addition, hatchery-produced fish that reach the weir may be used to supplement king salmon stocking programs at other Southcentral Alaska locations, thereby providing increased harvest opportunity in the Kasilof River early-run king salmon sport fishery, as well as other Southcentral Alaska king salmon sport fisheries.

This emergency order to restrict the early-run king salmon sport fishery in the Kasilof River during 2022 is in part, a continuation of an incremental approach to maintain harvest opportunity while assuring the SEG of naturally-produced king salmon and stocking goals can be achieved as king salmon production throughout Cook Inlet has been low. This will help to determine if standard regulations can be restored, sustain natural production and maintain harvest opportunity in the Kasilof River early-run king salmon sport fishery as well as other Southcentral Alaska king salmon sport fisheries supplemented by Crooked Creek hatchery stock.

PREVIOUS EMERGENCY ORDERS AFFECTED:

Emergency Order No. 2-KS-1-07-22, issued Wednesday, January 26, 2022, which prohibited the retention of naturally-produced king salmon and the use of multiple hooks while sport fishing in the Kasilof River from July 1 through July 31, 2022.

DISTRIBUTION:

The distribution list for this emergency order is on file at the Region 2 Office of Alaska Department of Fish and Game, Division of Sport Fish, 333 Raspberry Road, Anchorage, AK 99518, (907) 267-2218.
