**JUSTIFICATION:**

The Southeast Alaska king salmon sport fishery is managed under the directives of the *Southeast Alaska King Salmon Management Plan* (5 AAC 47.055). This plan provides management prescriptions based upon the allocation to the sport fishery as determined by *Allocation of king salmon in the Southeastern Alaska-Yakutat Area* (5 AAC 29.060). The allocation to the sport fishery for the 2024 season is 39,028 king salmon. To avoid exceeding the Alaska all-gear catch limit a 2% reduction has been applied to the Alaska all-gear catch limit which results in a management target of 38,250 king salmon for the sport fishery. This emergency order implements the management prescriptions called for when the sport allocation is between 34,303 and 42,684 king salmon.

In accordance with the *Southeast Alaska King Salmon Management Plan* (5 AAC 47.055), the sport allocation is used to determine the management provisions established for the 2024 season but inseason adjustments are not made for allocation.

**PREVIOUS EMERGENCY ORDERS AFFECTED:**

Emergency Order 1-KS-R-03-23 previously establishing resident and nonresident king salmon bag and possession limits and a nonresident king salmon annual limit for the 2023 season is superseded by this emergency order.

Emergency Order 1-KS-C-03-24 and 1-KS-E-07-24 which established sport fishing regulations for king salmon in areas where Alaska hatchery-produced king salmon will be returning near Juneau and Petersburg, are unaffected by this emergency order.
