**JUSTIFICATION:**

The *Kenai River Late-Run King Salmon Management Plan* (5 AAC 21.382) directs the department to manage to achieve the Stock of Concern recovery escapement goal of late-run king salmon into the Kenai River system. The recovery escapement goal for late-run Kenai River king salmon is 14,250 – 30,000 king salmon 75 cm mid eye to tail fork and longer.

Kenai River king salmon and other king salmon stocks throughout Cook Inlet are experiencing a period of low productivity and below average run strength. The 2026 forecast for the stock of large ( $\geq 75$  cm mid-eye-to-tail-fork-length [METF] or approximately  $\geq 34$  inches in total length) late-run king salmon in the Kenai River is 12,718 fish. This total run forecast is below the recovery escapement goal range of 14,250 – 30,000 fish. The forecast is well below the historical average run of approximately 27,724 fish and just slightly higher than the recent 5-year (2021–2025) average total run of approximately 12,640 large fish. The 2026 run is forecast to be the 6th lowest on record. Closing the late-run king salmon sport fishery preseason is warranted until data from inseason assessment projects indicate that fishing opportunity can be provided without jeopardizing the achievement of the OEG.

**DISTRIBUTION:**

The distribution list for this emergency order is on file at the Region 2 Office of Alaska Department of Fish and Game, Division of Sport Fish, 333 Raspberry Road, Anchorage, AK 99518, (907) 267-2218.
