UPPER COOK INLET COMMERCIAL FISHING ANNOUNCEMENT No. 8
EMERGENCY ORDER NUMBER 2S-08-19

Upper Cook Inlet (UCI) Commercial Fishing Announcement No. 8 opens commercial salmon fishing with set gillnets in the Kenai and Kasilof sections of the Upper Subdistrict from 8:00 a.m. until 12:00 (midnight) on Monday, July 8, 2019. This announcement also extends commercial salmon fishing with set gillnets in the East Foreland Section of the Upper Subdistrict from 7:00 p.m. until 12:00 (midnight) on Monday, July 8, 2019. By regulation, the East Foreland Section set gillnet fishery will be open for the regularly scheduled fishing period from 7:00 a.m. until 7:00 p.m. on Monday, July 8, 2019.

As of July 6, the Kasilof River sockeye salmon escapement projection exceeds 220,000 based on average run timing. Fishing in the above described waters is warranted in order to harvest sockeye salmon returning to the Kenai and Kasilof rivers.

The Kenai River late-run king salmon sport fishery was restricted to fishing with no bait beginning on July 1, 2019. According to 5 AAC 21.359(e)(3)(A) *Kenai River Late-Run King Salmon Management Plan*, if the use of bait is prohibited in the sport fishery, commercial fishing periods in the Upper Subdistrict set gillnet fishery, excluding the East Foreland Section, are open for no more than 48 hours per week beginning July 1, with a 36-hour continuous closure per week beginning between 7:00 p.m. Thursday and 7:00 a.m. Friday. With regularly scheduled fishing periods on Mondays and Thursdays no longer in effect in the Upper Subdistrict set gillnet fishery, except for the East Foreland Section, any and all fishing time provided to this set gillnet fishery may occur only via EO beginning July 1, 2019. With this announcement, the Upper Subdistrict set gillnet fishery south of the East Foreland Section will have fished 16 of the available 48 hours for the management week of July 7 through July 13.

As a reminder, Upper Cook Inlet Commercial Fishing Announcement No. 4 implemented gear restrictions in the Upper Subdistrict set gillnet fishery, except for the East Foreland Section, from July 1–31, 2019, unless superseded by subsequent EO. The specific gear restrictions are identified
in 5 AAC 21.359(e)(3)(A)(i), where it states that if bait is prohibited in the Kenai River king salmon sport fishery in order to achieve the SEG, then the number of set gillnets operated in the Kenai and Kasilof section set gillnet fishery may also be restricted to no more than four set gillnets that are each not more than 35 fathoms in length, 105 fathoms in aggregate length, and 29 meshes in depth, or no more than two set gillnets that are each not more than 35 fathoms in length and 45 meshes in depth. Set gillnets that are not more than 29 meshes in depth must be identified at one end of the gillnet with an attached blue buoy that is not less than nine and one-half inches in diameter. Set gillnet mesh size regulations do not change under these restrictions. These set gillnet gear restrictions will be in effect in the Kenai and Kasilof sections of the Upper Subdistrict beginning July 1, 2019.

By regulation, all other set gillnet fisheries in Upper Cook Inlet, will fish their regularly scheduled period from 7:00 a.m. until 7:00 p.m. on Monday, July 8, 2019. Also by regulation, drift gillnetting will be open district-wide from 7:00 a.m. until 7:00 p.m. on Monday, July 8, 2019. Drifters are reminded that drifting may not occur within one and one-half miles of the mean high tide mark in that area of the Kenai and Kasilof sections of the Upper Subdistrict south of the Kenai River and within one mile of the mean high tide mark north of the Kenai River if fishing with set gillnets in that area is closed.
