SITKA SOUND HERRING FISHERY ANNOUNCEMENT

The Sitka Sound herring sac roe fishery opened at 9:45 a.m. today and will close by field announcement on marine VHF radio. Open waters for this fishery include the area south of 57°10.78' N lat, north of 57°08.40' N lat, and west of 135°23.41' W long.

The attached map shows the boundaries for a Sitka Sound herring sac roe fishery opening as initially announced at approximately 8:45 a.m. on this date by field announcement on marine VHF radio. This map is for informational purposes only and is subject to change at any time by subsequent field announcement. Any boundary changes made by subsequent field announcement will not be published in fishery updates on this date.

The department has determined that the opening described above would not harm a reasonable opportunity for participants in the subsistence fishery to harvest the amount of roe necessary for subsistence uses. When making this determination, the department considered: 1) vessel surveys conducted by the department indicated that there is a large biomass of herring in the regulatory closed waters extending from Eliason Harbor to Starrigavan Bay; 2) while subsistence branch sets were observed in the area of Kresta Point, there was no herring spawn observed in the water on the adjacent shoreline of the open area.

Under Alaska's Health Advisories 1, 2, 3, and 4, commercial fishing is an Essential Business and is part of Alaska's Essential Services and Critical Infrastructure. Commercial fishermen should ensure that all travel and other activities in support of commercial fishing operations follow protocols in Alaska COVID-19 Health Advisories. COVID-19 Health Advisories may be found here: <https://covid19.alaska.gov/health-advisories/>.
