**SITKA SOUND HERRING FISHERY UPDATE # 22**

Today's aerial survey of Sitka Sound covered an area ranging south to West Crawfish Inlet, north to Krestof Sound, and west to Cape Edgecumbe. Weather and visibility were fair with overcast skies, rain and snow showers, and 10-knot winds. Approximately 20.0 nautical miles of spawn was observed today along the Kruzof Island shoreline from Lava Island to Rob Point, the Magoun Islands, from Point Brown to Kresta Point, Promisla and Eastern Bays, on Gagarin, Crow, and Middle Islands, Whiting Harbor, near Indian River, Pirates Cove, and around Golf Island (Figure 1). Through April 6, the cumulative estimate of observed herring spawn in Sitka Sound is approximately 22.5 nautical miles.

The Sitka Sound herring sac roe fishery will continue to be open from 8:00 a.m. until 6:00 p.m. daily until closed by field or advisory announcement in the waters of Deep Inlet and Aleutkina Bay south of 57°00.81' N lat and east of 135°21.93' W long, and the waters south of the latitude of Povorotni Point at 56°57.13' N lat and north of the latitude of Aspid Cape at 56°41.75' N lat, except for the waters of Whale and Necker Bays. Fishing boundaries and times may be modified by subsequent announcement.

Harvest from April 5 was approximately 900-tons of herring. The estimated cumulative harvest through April 5 is approximately 14,700-tons of herring. Harvest estimates from today's fishery will be included in the next fishery update.

The next aerial survey is scheduled for Wednesday, April 7, and the next fishery update will be released after aerial and vessel surveys are completed.
