2021 KETCHIKAN HERRING FISHERY UPDATE # 8

An aerial survey was conducted today in the Craig and Revilla Channel areas as well as Sea Otter Sound. The weather was excellent with partly cloudy skies and calm winds.

Craig

Approximately 2.6 nautical miles (nmi) of active spawn was observed on the northwest side of Fish Egg Island, the Ballenas Islands, the western shore of Wadleigh Island, and the Alberto Islands. Predator activity has increased significantly throughout the area with numerous pods of sea lions extending from the south end of Fish Egg Island to Abbess Island. Fishermen are actively filling pounds. Approximately 60 pounds have had herring introduced.

The aerial survey in Sea Otter Sound continued to show numerous pods of sea lions along the northern Heceta shoreline from Camp Island to Port Alice. Approximately 2.1 nmi of active spawn was observed to the east of Port Alice extending towards Camp Island.

2021 Craig/Klawock Herring Summary

March 18, 2021	Limited predator activity.
March 22, 2021	Limited predator activity.
March 25, 2021	Slight increase in predator activity.
March 29, 2021	Reduced predator activity.
April 3, 2021	Slight increase in predator activity.
April 5, 2021	0.2 nmi of spawn on Fish Egg Island. Fisherman actively filling pounds. ~50 pounds filled.
April 6, 2021	1.0 nmi of spawn on Fish Egg Island. Fisherman actively filling pounds. ~55 pounds filled.
April 7, 2021	2.6 nmi of spawn on Fish Egg, Ballenas, Wadleigh and Alberto Islands. ~55 pounds filled.

Revilla Channel

No herring or herring spawn was observed on today's aerial survey. The cumulative herring spawn in state waters in Revilla Channel is 7.9 nmi.

2021 Revilla Channel Herring Summary

March 18, 2021	No predator activity.
March 22, 2021	No predator activity.
March 25, 2021	No predator activity.
March 29, 2021	5.8 nmi of spawn observed on Cat, Dog, Village, Double, and Mary Islands.
March 30, 2021	3.3 nmi of spawn observed on Cat, Dog, Village, and Double Islands.
April 3, 2021	Limited predator activity.
April 5, 2021	0.3 nmi of spawn on Mary Island.
April 6, 2021	0.1 nmi of spawn on Mary Island.
April 7, 2021	No activity.

The next aerial survey is planned for **Thursday, April 8**. Fishery updates will be released after aerial surveys are completed for the day.

Herring survey data collected by the department from aerial and boat surveys will be available online through the interactive herring spawn maps located on the department’s website at:
