**Prince William Sound Salmon Fishery Announcement #59**

**SEINE FISHERIES:** This announcement provides time and area for a commercial purse seine fishing opportunity on Monday, August 9 and **Tuesday, August 10**. VFDA estimates that 300,000-400,000 pink salmon are at the hatchery and not many fish are being observed elsewhere in the Port. With a low female percentage and high number of green fish, VFDA estimates they'll need 450,000-550,000 fish for broodstock. Future opportunities targeting VFDA pink salmon will be dependent on run entry and broodstock acquisition.

PWSAC began its cost recovery sales program on Monday, July 26, and has collected approximately 43% of the assigned pink salmon revenue goal. Run entry at all PWSAC facilities has increased in recent days but remains behind anticipated levels for this date. The most recent female percentage is from August 8 and was 31% at AFK and 32% at WNH. Cost recovery fishing at WNH, CCH, and AFK continues today. To expedite PWSAC cost recovery efforts, with the intention of providing more consistent common property fishing periods, the area available for cost recovery fishing has been expanded to portions of each facilities' respective subdistricts, through Wednesday, August 11. Area was adjusted in each subdistrict to allow for passage of wild stocks.

Recent aerial surveys of the Southeastern, Southwestern, Montague, and portions of the Eastern District indicate pink and chum salmon are within or above anticipated levels for this date. Additional aerial surveys assessing the strength of wild stocks is ongoing and dependent on weather.

Recent preliminary contribution estimates, are as follows:

- Eastern District on August 1: 38% SGH, 7% CCH, and 55% wild.
- Coghill District on August 1: 56% WNH, 3% CCH, 1% AFK, and 39% wild.
- Northern District on August 3: 30% WNH, 23% CCH, 11% SGH, and 36% wild.
- Southeastern District on July 28: 3% SGH, and 97% wild.
