Waters north of this line, within sloughs, and in Boswell Bay within the bay (5 AAC 24.350 (1)(A)) are closed to commercial and subsistence salmon fishing during all periods.

During the commercial fishing season, subsistence harvest may occur in the Copper River District concurrent in time and area with commercial fishing periods until the Copper River District is closed at the end of the season. Additionally, waters of the Copper River District, excluding the expanded Chinook salmon inside closure area, will open to subsistence fishing from 6:00 am to 10:00 pm on all Saturdays from May 18 through October 28. Prince William Sound Management Area salmon subsistence permits may be obtained through any ADF&G office or online (<https://www.adfg.alaska.gov/Store/>). In Cordova, permits will be available during normal business hours Monday through Friday from 8:00 a.m. to 12:00 p.m. and 1:00 p.m. to 5:00 p.m. To assist with inseason harvest tracking, permit holders are encouraged to call the Cordova office at 907-424-3212 or report online (<https://www.adfg.alaska.gov/Harvest/>) to provide preliminary harvest reports.

The Miles Lake sonar crew deployed on May 10. The banks of the river are currently covered with shore ice in the vicinity of the sonar sites and river water level is low for the date. The north bank sonar was deployed for 19 hours over the last two days and 170 salmon were estimated for inriver passage. Preliminary harvest estimate from the 12-hour period that occurred on Monday, May 20 was 1,300 Chinook and 52,000 sockeye salmon with 400 deliveries reported. This compares to a projected harvest of 51,000 sockeye salmon for this period.

BERING RIVER DISTRICT: Bering River District, west of a longitude line at 144° 28.20' W., will open at 7:00 am on Thursday, May 23 for a 12-hour commercial drift gillnet fishing period. The intent of this opening is to target Copper River sockeye salmon that are traveling through the western portion of this district. **As overlap with the Bering River sockeye salmon run timing increases, the likelihood of future early season opening in the Bering River District will diminish. Additionally, future openings of the Bering River District will be contingent on accurate reporting of harvest from within this district.**
