Date of Release: 04/02/2025

Time: 1:00 P.M.

Chignik Commercial Salmon Fishery Update #02

Modifications to the planned management actions focused on Chinook salmon protection for the upcoming 2025 commercial salmon fishing season are as follows:

If more than 5,000 Chinook Salmon are harvested throughout the season, the districts primarily responsible will be immediately closed through August 7, rather than for the remainder of the season. Additionally, inner bay openings may still be allowed to provide an opportunity to harvest surplus local pink and/or chum salmon stocks if Chinook salmon are determined to not be at risk.

The Department will continuously monitor the Chignik Chinook salmon run. If it appears that the BEG will be reached, these additional management actions may be relaxed.
